Tower Crane Solutions for Wind Turbines

- Liebherr has become the first manufacturer of tower cranes to develop a complete package.
- Tower cranes can operate precisely even in high wind speeds.
- **Easy to transport:** The logistics cost for transporting a tower crane is much lower than for comparable crane systems.
- **Require very little space for erection:** The area requirement for erecting the crane is around 50 % of other crane systems.
- **High working speeds:** Loads can be lifted at speeds of up to 37 m/min.
- **Everything in view:** A perfect view of the load makes it easier for the crane driver to position units precisely.

ISSN: 1304-6799

Dear Readers,

DETAY Economic Magazine is in its 32nd year.

We are glad to share our pleasure for having our magazine reach such a level, thanks to this togetherness since 1987.

Having gained great experience in the media sector for thirty-one years in Turkish and English on weekly basis, **DETAY Economic Magazine** is celebrating its 32nd anniversary of publication on 6 April 2018.

Our website www.detayhaber.com.tr, which was upgraded in summer 2017, has also been accessible since 2004 and we thank our followers who have made it one of the most visited websites in its sector with daily 65.000 clicks. We look forward to further years of publication to provide the readers with 'accurate and elaborate' reports in the magazine and the website.

Now we are distributing our new supplement, the 32nd **Tenders Review** in Turkish & English, which supplies you with major projects & investments realized in 2017 and various economic forecasts of 2018 in Turkey.

Among the major projects that had been in the coverage all year round in different issues and on the website www.detayhaber.com.tr last year were BOTAŞ's naturalgas pipelines, YEKDEM renewable energy projects, İstanbul M. Municipality's subway projects, DSI's drinkingwater projects, İstanbul M. Municipality's subway projects, Health Ministry's hospital constructions in various locations, TEİAŞ- led energy lines, TOKİ's housing projects.

Our supplements, highlighting some economic reviews as well as information on various other sectors, including privatizations, defense industry projects, iron-steel & cement sector reviews, are being issued for 'free' to all the public institutions, governorships, municipalities, provincial administrations, foreign embassies, offices of trade attaché, foreign firms in Turkey, land-sea-air transport companies, firms operating in the iron-steel sector as well as in the automotive, logistics and inspection sectors.

Dear Readers,

We would welcome your criticism about the content of the Supplement, which has appeared after a three-month preparation, and for any errors that might have occurred despite our careful editing. Any recommendations from our readers are taken into consideration for the next issues.

We wish all mankind to have a prosperous year, with urgent relief and peace for the Middle East in 2018.

Read DETAY & Widen Your Horizon.

A REVIEW OF BUSINESS & ECONOMIC DEVELOPMENTS IN 2017

After the Turkish economy had had to experience the year 2016 with hardships due to some challenging developments and other terror acts to various regional and global turmoils, it marked the year 2017 with a growth performance. The double digit growth rate has differentiated the Turkish economy from the EU, G20 and OECD countries in the 3rd quarter of 2017.

According to a compilation, Turkey's strong growth performance exhibited in 2017 exceeded the forecasts of international institutions and organizations such as the International Monetary Fund (IMF), World Bank, Moody's and Fitch. These organizations had to go to revision in their projections for Turkey's economy.

Turkey's economy grew by 5.3 % in the first quarter, 5.4 % in the second quarter, 11.1 % in the 3rd, and 11.6 % in the third quarter of 2017, and it has caught the highest growth performance after 23 quarters with an average % 2.5 times more than the EU countries.

Even if Turkey's economy records a zero growth performance in the fourth quarter, the 5.5 % growth target has been approached as predicted in the Medium

Term Program (OVP) for 2017, by means of the 3rd quarter figures.

With Premier Binali Yıldırım-led 66th Government established, there were changes in the management of the economy. While some ministries had new names, some other ministers left. Mehmet Şimşek became the Deputy Prime Minister responsible for the coordination of the economy and public banks.

Arrangements that enable the economy to breathe

In order to dissipate the negative atmosphere created by the turmoil in the international conjuncture and the surrounding countries and to stimulate the economy, some regulations that relieve both real sector and the citizen's pocket have been put into force.

Access of the SMEs and exporters to financing has been facilitated. For this purpose, the upper limit of the amount of the remainders of the bails provided by the Credit Guarantee Fund (KGF) in Treasury-backed loans has been increased from 20 to 250 billion TL.

While a portfolio guarantee system (PGS), which accelerates the bailing process, has been established, the Treasury has been assigned to go bail for those out of KOBİs (SME) by 85%, for KOBİs by 90% and for the exporter by 100%, depending on the situation of the loan. In order to stimulate the construction sector, VAT (KDV), stamp tax and title deeds were levied. A record amnesty of the registry involving millions of citizens and companies that had borrowed earlier from banks entered into force.

While the Law on the Restructuring of Certain Receivables No 7020, which aims to structure some public receivables, came into force, the applicants who had failed during the previous restructuring period (Law no. 6736) have been given a second chance as they had lost their rights because they could not make their payments on due time. The Private Consumption Tax ("ÖTV"), which is received from white appliances and some small household appliances, has been reduced to 8%, which revived these sectors and opened the way for the citizens to buy these goods at cheaper prices.

Defense industry Show

The Turkish defense industry has experienced the excitement of the International Defense Industry Fair (IDEF) this year. Domestic companies have stamped their potential with their indigenous and innovative products. The inventory of the Turkish Armed Forces and security forces has been strengthened through the introduction of domestic products.

Several projects have been launched to produce domestic engines that are critical to reducing foreign dependence on defense industry products. A final test shot of 280 kilometers from Sinop to the offshore of the Black Sea was successfully carried out before the delivery of the KAAN Missile, developed by Roketsan before delivery to the Turkish Armed Forces.

Turkish car sets on the way

The Medium Term Program (OVP), which has outlined the road map for the economy, has envisaged the Gross Domestic Product (GDP) to exceed 4 trillion dollars, inflation figures to drop to 5% gradually, and unemployment to go down to single digits by 2020.

The Turkish local automobile deal was signed up. President Erdoğan announced the companies that will produce the automobile at the Promotion Meeting for Turkey's Automobile Joint Venture. They are Turkcell, BMC, Kıraca Holding, Zorlu Holding and Anadolu Group. The foundation was laid for "1915 Canakkale Bridge", the longest intercity spanned bridge in the world and Malkara-Canakkale Motorway.

2.5 tons of gold came out of the pillow

In order to earn the gold out of the pillow, gold bonds and gold-based rental certificates were issued. In October, during the initial demand period of 4 weeks, about 2.5 tons of gold worth 370 million TL were taken out of pillows. In order to prevent the increases in red meat prices in the domestic market, customs taxes applied on slaughtered livestock and carcass beef were reduced.

Increase in MTV debated

The sharp rise of the Motor Vehicle Taxes (MTV) was also among the agenda items of 2017.

The MTV, which had been announced by Finance Minister Naci Ağbal to be up by 40 % was revised to 25% in the "bag law" upon public reaction and the notice of President Recep Tayyip Erdoğan.

The major economic events witnessed in Turkey in 2017 have been compiled as follows:

5 January

- Transportation Minister Ahmet Arslan said that Baku-Tbilisi-Kars railway will go into service in mid2017

-Turkish Statistics Institute (TÜİK) announced that in December 2017, TÜFE (CPI) rose by 0.69 % and Y-ÜFE (D-PPI) by 1.37 %.

OBLIGATION TO USE DOMESTIC GOODS IN CONSTRUCTION WORKS

In order to support domestic production, it has been obligatory to prepare tender documents in a way to enable the use of domestic products in the public sector's construction tenders.

A regulation has been rearranged in the tender legislation to introduce the obligation to use local goods in the construction works tenders within the framework of domestic production support policy through public sector tenders, after a recent arrangement of the commodity procurement tenders

In July, legislation was revised regarding the use of domestic machinery, materials, equipment and software in construction tender contracts.

With the subject arrangements, it is ensured that the specifications will be prepared in a way to bring the condition of supply of all or part of the machinery, materials, softwares and equipment to be used in the construction works.

The machinery, materials and equipment and other commodities, as listed with the decision of the relevant Ministry and Public Bidding Authority, should be locally supplied for use in the construction projects.

In the Regulation on the Amendment of the Regulation on the Implementation Regulations in Construction Works, as published in the Official Gazette dated 13 December 2017, tender specifications are to be prepared in consideration of the lists of domestic commodities (of those out of the technical reasons prepared by Ministry of Environment and of machines and equipment as prepared by Ministry of Science and Industry).

It is also stated that the tender documents should be prepared in such a way as to ensure the use of domestic products during the construction phase and that "the Regulation stipulates that tender documents of the administrations clearly state the conditions relating to the procurement of domestic products to be used in the scope of the tender and that, in the construction phase, building supervisors control the utilization of these products."

The construction tenders reached a volume of 80 billion TL in 2016, and the obligatory use of local products in such tenders could provide important contribution to the development of the domestic industry.

CENTRAL BANK'S 2018 MONETARY & EXCHANGE RATE POLICY

The Central Bank will maintain its price stability-oriented monetary policy framework and inflation targeting will continue to shape the monetary policy regime in 2018, according to the Bank's *Monetary and Exchange Rate Policy for the 2018* report issued .

"Monetary policy decisions will be based on inflation expectations, pricing behavior and other factors that affect inflation," the bank said.

"Financial stability will also be considered while inflation is aimed to be kept close to the target," it said. The bank added that it will continue to cooperate with other institutions to remove structural impediments to lowering inflation.

Saying that its main objective is achieving and maintaining price stability, "to this end, the inflation target for the 2018-2020 period is set at 5 percent as per the agreement reached with the government," it said.

"In line with the Medium-Term Program, it is anticipated that inflation will gradually converge to the 5 percent target in 2018-2020," the bank said.

Below are the main highlights specified by the Central Bank to be followed in the new period:

As in 2017, the CBRT will continue to use liquidity tools with an appropriate composition and in a manner to support predictability in line with its objective of achieving price stability. Considering all possibilities in liquidity conditions; to be able to control interest rates at the BIST Repo-Reverse Repo Market and the Interbank Repo-Reverse Repo Market, to manage the funding need of the financial system, to preserve the instrument diversification for liquidity management and operational flexibility, the CBRT needs to maintain a sufficient

amount of GDDSs or TL-denominated lease certificates issued by the Asset Leasing Company of the Turkish Treasury (ALCTT) for technical reasons. Accordingly,

- ✓ Without prejudice to the additional purchasing option, the OMO portfolio, which was set as TL 15 billion nominal for 2017, is set as TL 16 billion nominal for 2018,

- ✓ Outright purchase operation of 6.8 billion TL nominal, including the TL 5.8 billion nominal to be redeemed in 2018, will be conducted in 2018,
- ✓ Outright purchase operations will be conducted in a balanced and predictable framework by taking into account the CBRT OMO portfolio redemption schedule, liquidity conditions in the market and internal borrowing program of the Undersecretariat of Treasury, and the securities to be purchased by the CBRT will be announced through data dissemination companies at 10:00 a.m. on the first working day of the respective month,
- ✓ Buying auctions will be held on Mondays, Wednesdays and/or Fridays with value the next business day, Each auction amount will be no more than a nominal of TL 150 million,
- ✓ Other issues related to the auctions will be subject to the existing regulations and may be changed if deemed necessary.

First PPK meeting

Turkey's Central Bank has also issued the calendar of meetings.

The first Monetary Policy Board Meeting of 2018 will be held on 18 January.

2018 INVESTMENT PROGRAM'S PROJECT VALUE 804.6 BILLION TL

The "2018 Annual Investment Program" prepared in line with the investment targets comprises a total of 3.212 projects with a project cost of 804.6 billion liras, cumulative spending of 308.2 billion liras and an allocation of 88 billion liras in 2018.

The Decision of the Council of Ministers on *the Implementation, Coordination and Monitoring of the 2018 Annual Program* was published in the doublet issue of the Official Gazette dated 15 January 2018.

Accordingly, the program was prepared in line with the targets set out in the Tenth Development Plan, in the Medium Term Program 2018-2020 and in the 2018 Program.

The "2018 Annual Investment Program" comprises a total of 3.212 projects with a project cost of 804.6 billion liras, cumulative spending of 308.2 billion liras and an allocation of 88 billion liras in 2018.

The investments in the "2018 Annual Investment Program" have been arranged on sectoral basis.

They will be carried out by Public administrations within the scope of general budget, public administrations within the scope of special budget, regulatory and supervisory institutions, economic state enterprises and public economic institutions with over 50 percent of public share and their subsidiaries, organizations under the scope of privatization, social security institutions, and projects to be realized by municipalities, institutions, revolving funds, Iller Bank, metropolitan municipalities using foreign project loans and by other municipalities.

The "2018 Annual Investment Program" comprises the amendments enacted by the Turkish Parliament during the process of debating the 2018 Central Management Budget Law Draft ...

Investment projects have been classified as "study project works", "ongoing projects" and "new projects". For each project, project number, name, location, characteristics, start and ending date, project amount, estimated amount of expenditure until the end of 2017 and 2018 payments are separately indicated.

Of the capital transfer appropriations in the Central

Government Budget Law of the year 2018, only those that are of public investment type are included in the sum of enterprise and sector investment allowance, and some of the transfers which are not public investment but of out- of –public- sector transfer type are not included in the sum of enterprise and sector investments and have remained associated with the 2018 Investment Program.

Investment allowances of public administrations within the scope of general and special budget, personnel expenses related to investments, real estate purchase and expropriation allowances and rental payments of city hospitals have not been included.

Investment allowances of public administrations within the scope of general and special budget do not cover personnel expenses related to investments, real estate purchase and expropriation allocations and rental payments of city hospitals.

Regulatory and supervisory agencies are included in the 2018 Investment Program for information on investment-grade projects, except for property acquisition and expropriation payments.

Within the scope of the "Support for the Infrastructure of Villagers Project (KÖYDES)" in the Central Government Budget Law of 2018, a budget of 900 million TL has been allocated in the related budget of the Ministry of Finance to be used for provincial special administrations and / or village service unions for rural infrastructure needs.

Within the scope of the Water Sewerage and Infrastructure Project (SUKAP) within the scope of the Central Management Budget Budget Act of 2018, 719 million 270.000TL appropriation has been reserved in the related budget of the budget of the Ministry of Finance to realize the drinking water and wastewater projects of the municipalities.

The subject allocation is not included in the sum of the investment program and its use will be realized within the provisions of the 2018 Central Management Budget Law.

The principles and procedures concerning the allocation, disbursement, monitoring and supervision of the allocation of this allowance for SUKAP on the basis of municipalities shall be decided by the High Planning Council.

2018 PROGRAM IMPLEMENTATION IN OFFICIAL GAZETTE

The Decision on the "2018 Program" and "Implementation, Coordination and Monitoring of the 2018 Program" was published in the Repeated Issue of the Official Gazette dated 28 October 2017.

Accordingly, the implementation, coordination and monitoring of the legal and institutional arrangements in the 2018 Program will be carried out in line with sectoral programs, priority action programs, economic, social and regional development policies and related investments and measures at every echelon of the relevant ministries and agencies, as per the appropriate study schedule.

In this context, it will be ensured that the projects that will be prepared in accordance with the priorities as included in program and strategy documents prepared for conformity to the EU as well as the National Program of Turkey for Undertaking the EU Acquis, the Strategic Framework Document, and the Indicative Strategy Document for Turkey (2014-2020), to be financed by the EU funds, are compliance with the 2018 Program and the investment program integrity of national contribution to be provided by Turkey.

Legislation, administrative decision and financing, which will be needed in the implementation of action plans for priority transformation programs, will be given priority by all the public institutions and organizations. In the implementation of the 2018 Program, the basic principle will be that investments are not to be changed or their budgets not transferred and that macroeconomic targets be taken into consideration and balances among sectors and regions not be disrupted.

No spending on the projects not included in the program

The implementation of the 2018 Investment Program will be based on the priorities of the Tenth Development Plan, the Medium Term Program (2018-2020) and the 2018 Program.

The additional financing requirements of the projects involved in the program will be met primarily through transfers from the allocations to the other projects, in accordance with the principles set out in this decision. Organizations will have to limit any additional funding demands relying on their urgent and compulsory needs, taking into account their budgetary opportunities. No expenditure will be made for any projects not included in the program. Projects will be associated with the

investment program regardless of the source of funding (including grants, land pledges and the like).

The Ministry of Finance and the Undersecretary of Treasury will take the necessary measures to ensure that the Annual Program financing needs are met on time, taking into account the construction season, and that the necessary resources are transferred to the appropriate institutions that are convenient to the expenditure programs. All transactions such as investment project proposal related to public investment program processes, determination of sub-projects, revisions of the project parameters including additional financing demand, cost increase and allocation change, notification of expenditure data, will be executed through the Public Investments Informatics System (Ka-Ya).

The investment program will be settled by the Supreme Planning Council is authorized to review, for inclusion into the Investment program, the demands for Projects that cost more than 100 million TL, or Development ministry approval will be required for those whose cost is up to 100 million TL or those which will be completed in the year with 100 mln TL expenditure regardless of their costs. Demands for project exclusion from the program for those whose cost is up to 100 mln TL will be concluded with the approval of the Ministry of Development, and those whose cost is over 100 mln TL will be handled by the Supreme Planning Council (YPK).

Allocation changes

Allocation of additional allowances up to a total of 100 million liras to be made during the year (including sub-projects of aggregated projects) from any sources will be handled with the Development ministry approval, and the additional allocations exceeding this amount on project basis will be settled by the YPK. However, the amount of funding realized on revolving capital revenues and the estimated income amount specified in the Budget Law of the budgetary institutions and the local revenue transferred from the previous year shall be included in the Investment Program with the approval of the minister with which the institution is affiliated, the rector of the university and the higher manager of the other institutions, for being associated with projects.

The project revision requests can be sent to the Ministry of Development by December 15, 2018 and the requests will be finalized by the end of the year.

EXPORTS REACHED \$157.1 bn VALUE IN 2017

The Turkish Exporters Assembly (TİM) announced Turkish export figures for 2017. For Turkish exports, 2017 was a lucrative year, recording the second highest figure in the country's history and generating \$157.1 billion. The figure was particularly boosted by six sectors.

Six sectors broke record off all time last year

According to the data of the Turkish Exporters Assembly (TİM), the automotive, machinery, jewelry, defense and aviation, fruits and vegetables and ornamental plants sector reached their highest annual levels in exports.

TİM Chairman Mehmet Büyükeksi noted that exports in 2017 increased every month without exception and recalled that the increase in exports was in double digits in eight months of the year. Büyükeksi said the automotive, machinery, jewelry, defense and aviation, fruits and vegetables and ornamental plants sectors reached their highest annual export levels.

Automotive again the pioneer of exports

The automotive exports, which stood at only \$2.4 billion in 2000, reached the highest all time level with \$28.5 billion in 2017, while in the same period, the machinery sector reached an all-time high with \$6.1 billion, followed by the jewelry sector with \$3.3 billion, the defense and aviation sector with \$1.7 billion, the fruits and vegetables sector with \$1.4 billion and the ornamental plants sector with \$85 million.

Meanwhile, the provisional data revealed that the unit price of exports in 2017 was \$1.36.

Turkey recorded the second-highest export volume in the republic's history with \$157.1 billion in 2017, according to provisional data of the Ministry of Customs and Trade. Turkey's exports reached \$157.1 billion in January-December 2017, marking an increase of 10.22 percent, the ministry's data bulletin showed.

Turkey's highest export figure was recorded in 2014 with \$157.6 billion, according to official data.

The export figure came after Turkey's highest growth performance in three quarters of 2017.

The country's economy expanded beyond forecasts in the first quarter (5.3 percent) and second quarter (5.4 percent) of this year, according to TÜİK.

Turkey became the fastest-growing economy among G20 countries with its unexpectedly high 11.1 percent growth in the third quarter of 2017. The report said the import of the country rose by 17.92 percent to \$234.2 billion in the period. Turkey's foreign trade volume accounted for \$391.3 billion, rising 14.70 percent in January-December 2017. The foreign trade deficit of the country annually increased by 37.5 percent in the same period, accounted \$77.06 billion.

November Exports Up by 11.2 Percent

Turkey's exports increased by 11.2 percent in November, reaching \$14.21 billion, while exports went up 21.3 percent to reach \$20.54 billion, the Turkish Statistical Institute (TÜİK).

TÜİK also said the foreign trade deficit rose 52.4 percent in November, amounting to \$6.3 billion.

The rate of exports meeting imports, meanwhile, fell to 69.2 percent compared to 75.5 percent in November 2016. Despite currently frosty relations between Ankara and Berlin, Germany was Turkey's top trading partner in November in terms of both imports and exports. Exports to Germany stood at \$1.38 billion, while imports from the country reached \$1.98 billion. Turkey's exports in the first 11 months of 2017 amounted to over \$143.2 billion — a 10.4 percent rise compared with the same period in 2016, TÜİK said.

The new year will be more successful than 2017

President of the Turkish Exporters' Assembly (TİM) Büyükeksi said that Turkey will break previous export records by crossing the medium-term program's \$169 billion target in 2018, the country's largest exporters' association said.

FIAT PROFESSIONAL İŞTE SAĞLAM ORTAĞIN

Her ihtiyaca uygun tasarlanmış Fiat ticari araçlar,
şimdi Fiat Professional markasıyla işinizi ileri taşıyor.
Fiat Professional ailesiyle ticaret güçleniyor!

İşte sağlam ortağın. **Fiat Professional.**

Büyükeksi said they prepared a roadmap to exceed the targets.

"The support from the government and the recovery of the global economy was reflected on our exports," he said.

He added that the government's export target for 2017 was \$153.3 billion and it had been revised to \$156.5 billion.

"We expect that Turkey's exports will rise over 10 percent to \$14 billion in December and we will overtake this target by reaching \$157.3 billion," he said.

Turkey's exports amounted to \$13.6 billion in November and \$142.7 billion in the first 11 months of 2017, according to TIM's data. Early November, Turkish Economy Minister Nihat Zeybekci had said the country is expected to exceed its revised export target of \$156.5 billion by the end of 2017.

He expressed that exports reflect Turkey's growth, calling on international ratings bureaus to revise Turkey's growth estimate figures.

Exports to 33 countries in 23 sectors exceed 1 - billion -dollar limit

TİM President said Turkey's exports to 185 destinations increased in 2017, noting that they reinforced their presence in many countries in this period regardless of their proximity.

Noting that their exports to Iceland went up more than six-fold, followed by Haiti with a four-fold increase, Büyükeksi said the exports to Jamaica, Malta and Panama rose by over 100 percent, while exports to

Liberia, Singapore and the Dominican Republic almost doubled.

,"With the crisis that we experienced with Russia now left behind, we reached an increase of 51.2 percent in exports to Russia this year," he added.

Büyükeksi stated that even though the top 20 countries that Turkey exports to the most remained unchanged in 2017, the ranking slightly changed. Noting that the top three are Germany, the U.K. and Italy respectively, Büyükeksi said the U.S., which ranked fifth last year, rose to fourth place this year with the increase in automotive exports, while China ranked fifteenth, rising three places in a row.

"Countries such as Israel, Romania, Bulgaria found their place in higher ranking this year. In the top 20, we got the highest export increase in Russia," Büyükeksi continued, adding that exports to Spain, the U.S., China and Belgium increased by more than 20 percent, while double digit increases were achieved to the U.K., Iraq and Poland.

Rise in global trade affects exports positively

Büyükeksi pointed out that they expect global trade to reach \$ 16.5 trillion this year.

Second, the support of the government gave them strength; support for R & D and Design Centers, support for membership in E-commerce sites, green passport, increase in Eximbank's capital, financing and employment provided by KGF's companies.

"Thirdly, as TIM, we set our priorities well in exports and created our strategies in this frame," he noted, adding, "As is the case every year, this year we gave special importance to value added exports.

Our activities such as Innovation and Entrepreneurship Week, Design Week, which we organized, served this purpose.

We will continue to make all these efforts this year, too. "

KANAL İSTANBUL PROJECT'S ROUTE UNVEILED

Kanal Istanbul Project route will follow the Küçükçekmece-Sazlıdere-Durusu corridor, the fourth alternative for the project, was chosen as the most convenient route. The 45-km route will enter Küçükçekmece Lake and reach the Black Sea through the Sazlıdere Dam from east of Terkos Lake.

Transport, Maritime Affairs and Communications Minister Ahmet Arslan unveiled the final route of the Kanal Istanbul Project, a canal parallel to the Bosphorus that is planned to connect the Black Sea and Marmara Sea. The Project had been announced by President Recep Tayyip Erdoğan first in 2011.

Minister Arslan said, "We intend to complete the bidding process with a mixed model, including a build-operate-transfer model, and other public-private partnership alternatives, and to launch the project this year,"

Arslan said the first target in the project of making a new waterway connecting the Black Sea with the Marmara Sea on Istanbul's European side is to reduce the ship traffic on the Bosphorus in Istanbul.

Explaining that the target is to reduce the risks that could arise from vessels carrying dangerous substances through the Bosphorus and to provide a more modern life to the people who live in that area by carrying out urban transformation projects on the waterway route and removing irregular urbanization, Arslan said the third goal is to increase both the position and attractiveness of Turkey with waterway transportation in Istanbul. The canal is expected to have capacity for 160 vessels a day and is scheduled to be completed by 2023.

Arslan said that all the work carried out by the ministry's Infrastructure Investments Dept. and related institutions and organizations were evaluated and that

bidding for the preparation, project and consultancy services were held last year, adding that the work was initiated in August 2017.

Minister Ahmet Arslan Announces Route Details

Arslan said that all work, including the determination of alternative routes, evaluation of the current situation, numerical model studies, earthquake, tsunami, wind and wave climate and geological surveys were completed by the beginning of the year, explaining that each topic was handled in detail. Arslan said that they received support from experts who specialized and active in their fields from Turkey's leading universities such as ITÜ, Boğaziçi University, ODTÜ and Gazi University, as well as international experts. "Taking into account the feasibility within the framework of various elements such as mine, site and sensitive areas, geological studies, underground and surface water resources, soil resources, effects on maritime and transport networks, splitting volume, channel length, expropriation and effects on residential areas, studies continued on five routes," Arslan said.

According to numerical modeling studies, he said the preliminary models that will be the basis of the basic survey study was completed. He said groundwater currents along the project route were detected, adding that different types of earth were identified, and the permeability of each was determined to be different.

Noting that their work is carried out more precisely in the determined corridor in order not to adversely affect the ground water, Arslan said they will continue working more sensitively on the identified alternative.

He said that all studies were done taking into account earthquake risks and the average recurrence of 72 years, 475 years and 2,475 years. "All of these projects will continue to be evaluated together, including the project areas, which can be used as a logistics center, and the artificial islands that can be made by filling the Marmara Sea with the filling material to be produced in the Black Sea," Arslan said.

TÜİK ANNOUNCES DECEMBER INFLATION FIGURES

■ In December 2017, TÜFE (CPI) rises by 0.69 % and Y-ÜFE (D-PPI) by 1.37 %...

■ On annual basis, inflation in TÜFE becomes 11.92 % and in Y-ÜFE 15.47 %...

The Turkish Statistics Institute (TÜİK) has announced the December 2017 inflation figures as follows:

Domestic producer price index increased by 1.37 %

Domestic producer price index (D-PPI) increased by 1.37% on monthly basis, by 15.47% on December of the previous year basis, by 15.47% on same month of the previous year basis and by 15.82% on the twelve months moving averages basis in December 2017.

D-PPI increased by 1.91% for mining and stone quarrying, by 1.34% for manufacturing, by 1.67% for electricity and gas and by 0.27% for water supply compared with the previous month.

The highest monthly increase was in crude petroleum and natural gas

The highest rates of monthly increase in D-PPI by sub divisions of industry were index for crude petroleum and natural gas by 15.32%, for basic metals by 3.29%, for motor vehicles, trailers and semi-trailers by 2.72%. On the other hand the highest rates of monthly decrease in D-PPI by sub divisions of industry were index for metal ores by 1.58%, for wearing apparel by 0.33% and for coal and lignite by 0.07%.

According to main industrial groupings classification in December 2017, the highest rate of monthly increases was in energy goods and the highest rate of annual increases was in intermediate goods.

Consumer price index (CPI) up by 0.69%

A rise in general index was realized in CPI (2003=100) on the previous month by 0.69%, on December of the previous year by 11.92%, on same month of the previous year by 11.92% and on the twelve months moving averages basis by 11.14% in December 2017.

The highest monthly decrease 2.39% in clothing and footwear

In December 2017, the indices rose for food and non-alcoholic beverages 1.52%, for furnishing and household equipment 1.18%, for housing 0.77% and for hotels, cafes and restaurants 0.47%.

In December 2017, the indices declined for communication 0.17% and for alcoholic beverages and tobacco 0.01%.

Food and non-alcoholic beverages with 13.79%, miscellaneous goods and services with 12.77%, furnishing and household equipment with 12.74% and health with 11.90% were the other main groups where high annual increases realized.

The highest monthly increase 1.52% in TRC3 (Mardin, Batman, Şırnak, Siirt)

The highest increases in CPI were recorded in TRB2 (Van, Muş, Bitlis, Hakkari) region with 13.59% compared with the same month of the previous year and in TRC1 (Gaziantep, Adıyaman, Kilis) region with 12.79% on the twelve months moving averages basis.

Cemil Ertem: The actual correction in inflation in the first quarter.

Meanwhile, Presidential Chief Economist Cemil Ertem said that annual inflation was on a downward trend with December, but the actual correction would be caught in the first quarter of the year with about 200 base points. "We started to experience a downward correction in December after the summit we saw in inflation, and we will catch the real correction in the first quarter," he said.

According to some analysts, high core inflation is actually worse than high headline inflation, as the former can mainly be eased by monetary policy tools.

"Core inflation does not include volatile items, like energy or food. Therefore, it is becoming more and more difficult to fight against this," said SPINN Consultancy Co-Founder and academic Özlem Derici Şengül.

MERCEDES-BENZ TÜRK MARKS GLOBAL ACHIEVEMENTS IN ITS 50TH ANNIVERSARY

Closing the year 2017 successfully once more, Mercedes-Benz Türk has evaluated the automotive sector in 2017 and forecasts of 2018.

Mercedes-Benz Türk, which started operations in 1967 with the brand name *Otomarsan*, has today exceeded a turnover of 1 billion euros and thus it has become one of Turkey's largest foreign-owned companies. Mercedes-Benz Türk has continued its achievements in the Turkish truck market in 2017, when it has celebrated its 50th foundation anniversary in the industry. Mercedes-Benz Türk A.Ş. reached a value of 1,138 billion euros spent on the investments for half a century. The company realized sales of 423 units of buses, 9.128 units of trucks, 9.041 units of light commercial vehicles, and 25.588 units of automobiles in 2017. The second hand vehicle sales reached 4.598 units in total. Thus a total of 48.778 units of vehicles were sold all year in the face of challenging conditions.

Mercedes-Benz Türk's Hoşdere Bus Factory continued its productions despite adverse conditions, and produced 3.795 units of buses in 2017. Exporting about 90% of its production to West European countries, its bus export figures rose to 3.396 in 2017. The company's bus export volume has reached a total of 50.120 units since 1970 when the first export was made. Since 1968 when the first bus production started, Mercedes-Benz Türk has produced a total of 84.865 ea buses.

Mercedes-Benz Türk, whose first truck was launched off line in 1986, maintains its traditional leadership position in the truck market with trucks and trailers manufactured in the Aksaray Truck Factory. It has produced 246.147 units trucks since then.

The Aksaray Truck Plant produced 13.393 trucks in 2017 and the export volume of trucks increased by 38% compared to 2016, reaching the highest export figure of its history with 6.469 units truck exports. The total number of its truck exports has reached 43.738 since 1986.

In the Light Commercial Vehicle Group, the company was among the first two brands to reach the highest sales figures. The Mercedes-Benz Automobile Group also maintained its prominent position in the premium car segment and retained it in 2017.

Mercedes-Benz Türk Board of Directors President Süer Sülün:

President of the Board of Directors of Mercedes-Benz Türk Süer Sülün, stating that the year 2017 when Mercedes-Benz Türk celebrated its 50th anniversary was an important milestone for the company, said, "Without losing our belief in the Turkish market in 2017 we continued to offer new products to our market. Through our motivation because of our company's 50th anniversary enthusiasm we have preserved our traditional leadership as a result of our team work."

Sülün also said, "We are proud of the superior performance, history and tradition Mercedes-Benz Türk has shown for half a century. Despite the challenging conditions in the market in Turkey in 2017, we managed to maintain our leadership and intercity buses and trucks that has become traditional in the market. We focused on exports due to the decrease in domestic demand at the Hoşdere Bus and Aksaray Truck Factories and we continued our productions at the levels we had planned."

"Investments made in the Aksaray Truck Factory in 2016 started to give fruits in 2017 and Mercedes-Benz Türk's truck exports rose by 38 percent, reaching the highest export figure of all times. Our investments continued in 2017 as well. We realized the groundbreaking ceremony of the new R&D Center in May 2017 to be established with an investment of 8.4 million euros at the Aksaray Truck Factory." Sülün added.

Mercedes-Benz Light Commercial Vehicles Executive Committee Member Tufan Akdeniz:

Mercedes-Benz Light Commercial Vehicles Executive Committee Member Tufan Akdeniz, evaluating the year 2017, stated that they were among the top two brands that reached the highest sales figure in 2017.

"Turkey and light commercial vehicle market, recorded a growth of 2.9 percent last year compared to 2016 while the comparative light commercial vehicle market experienced a 1.7 percent expansion. Our Mercedes-Benz Türk Light Commercial Vehicles Group succeeded in raising the total sales in this area by 9 percent. As Mercedes-Benz Türk, we sold 9.041 units of light commercial vehicles in 2017, including *X-Class*, which we launched recently."

"Vito, with its low initial purchase cost, high quality standards, fuel economy, increased safety equipment, wide range of products suitable for different uses, reached the ever highest sales figure in 2017 with sales of 4.159 units. In our *Sprinter* vehicle segment, which has an important place in transportation of students and personnel as well as tourists and passengers in urban areas, we realized 4.644 unit sales."

"In 2017 we launched the 30.000th Sprinter minibus, which, since 2007, has been produced with the efforts of Turkish engineers and workers, under the cooperation of Mercedes-Benz Türk and Arobus. Another important development for the light commercial

vehicles group is that we logged into the pick-up segment in 2017, and we put on sale the curiously awaited X-Class Mercedes-Benz vehicle in Turkey in December. We sold 238 X-Class units within a month, making Mercedes-Benz the number one selling X-Class in global sales"

Mercedes-Benz Türk Hoşdere Bus Factory's production underway uninterruptedly

Meanwhile, Mercedes-Benz Türk's Hoşdere Bus Factory continued its productions despite adverse conditions, and produced 3.795 units of buses. *Travego*, *Tourismo*, *Conecto*, *Intouro* and *Setra* brands produced at the facilities are being exported to more than 70 countries. *Tourismo* is being renewed in 2018. Mercedes-Benz Türk reached a sales figure of 423 units in 2017 in the bus group despite tough competition environment.

Mercedes-Benz Türk Aksaray Truck Factory with higher capacity

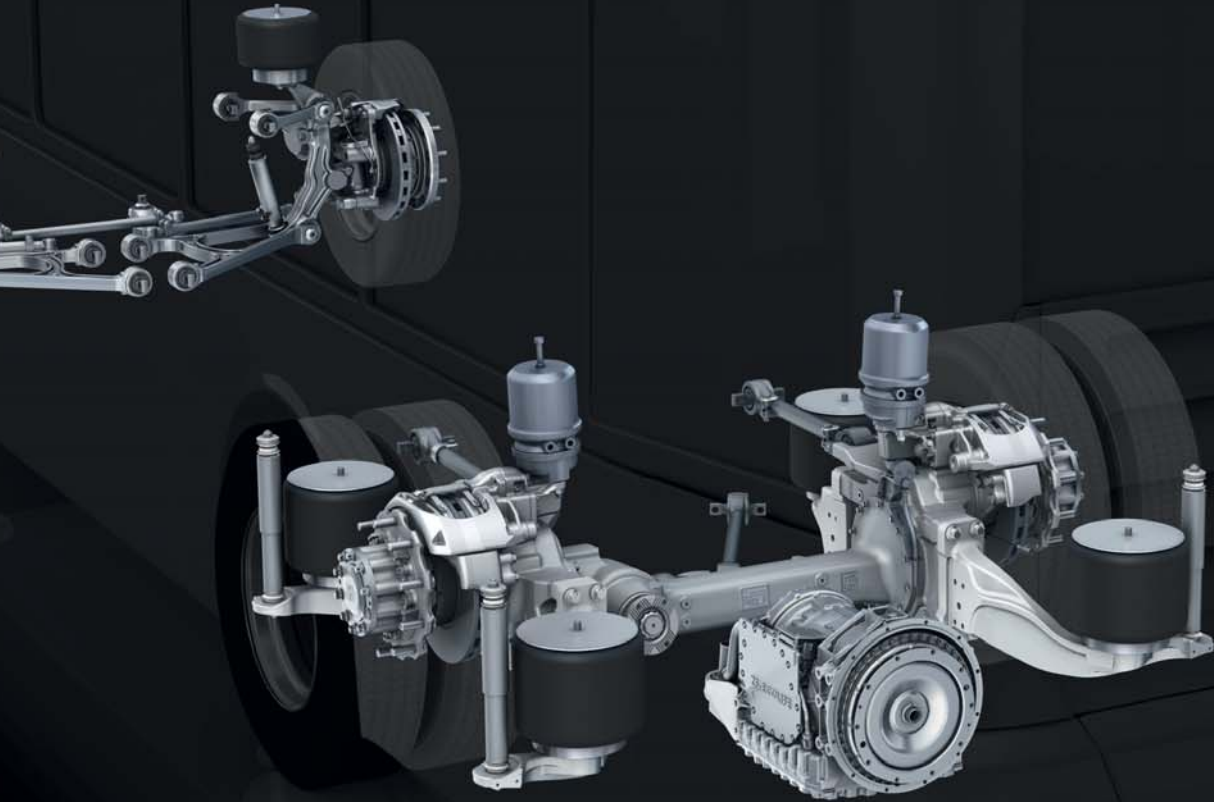

Mercedes-Benz Türk has started to buy new fruits of the investment made in 2016 in Aksaray Truck Factory. With the new R&D Centre, the Aksaray Factory will convey all the research and development services to the whole world. The company has reached its target in truck group in 2017 and realized sales of 9.128 units.

BAŞTAN SONA ETKİLEYİCİ: ZF'DEN KOMPONENTLER VE SİSTEMLER

Otobüs yolcuları maksimum güvenlik ve konfor bekler. ZF'nin şanzımanları ve aksları bu beklentilerin karşılanmasına yardımcı olmaktadır. Ürünlerimiz yolcuların araca hızlı ve güvenli bir şekilde inip binmelerini, güvenli ve keyifli bir yolculuk yapmalarını sağlıyor. Dahası, ZF ürünleri birbirlerine tam olarak uyumludur ve en üst düzey teknolojiyle geliştirildikleri için dinamik hızlanma ve aynı zamanda sessiz çalışma özelliklerine sahiptir. ZF komponentleri ile aracınızın hem kullanım ömrü maliyetlerini hem de araç ve çevre üzerindeki olumsuz etkileri azaltabilirsiniz. www.zf.com/buses

MOTION AND MOBILITY

FORD TRUCKS HAS DOUBLED ITS MARKET SHARE IN THE LAST TEN YEARS

Ford Trucks, raising its market share two-fold in the last 10 years, continued to attract the attention in 2017 with its new models and services, as well as in the field of domestic and foreign dealership restructuring and heavy commercial competition.

Ford Trucks has doubled its market share with new product and motor technology investments over the past 10 years, 4S plant infrastructure investments, service offerings and product development capabilities for customer expectations. In 2017 Ford Trucks, which has completed the number of domestic 4S facilities in 30, reached 33% in the construction segment and 27.7% in the overall market.

In 2017, Ford Trucks increased its sales in overseas markets by 50% with 8 new 4S facilities opened in Romania, Hungary, Bulgaria, Egypt, Croatia, Israel, Georgia and Ghana.

Serhan Turfan: "We reached 33% market share with our strong products in the growing construction segment."

Serhan Turfan, who had been in the post of Director of Ford Trucks Turkey since 2014, has been appointed as the Deputy Chief Executive Officer in 2018, made an evaluation of the heavy commercial vehicle market and domestic brands and overseas operations, during the 2017 evaluation meeting.

Turfan, pointing out that the heavy commercial vehicle market was completed with a similar volume to that achieved in 2016, said, "The year 2017 was a year

of prevailing big changes in the market as experienced before.

The trailer segment, which normally constitutes an average of 60% of the market, declined to 38% in last year, while the construction segment doubled with large construction projects in the market. The increase in the construction segment was a great opportunity for us with the right product investments we made and the appreciation of our products by our customers and we achieved a 33% market share in the construction segment. We reached 27.7% market share in the overall market and we managed to double our market share thanks to the right moves we have made since 2008. In 2017, we continued our product investments in the context of our customers' requirements."

He stated, "With the raised loading capacity, our 8x4 construction truck 4142XD, which we have developed in accordance with the heavier working conditions has carried out much more work in less time, and we supplied our trailer 3542T with a new lightweight mixer and concrete pump suitable for tough construction site conditions, with high chassis strength, as well. In the giant projects of Turkey such as the 3rd airport Project, North Marmara Motorway bridge and Çanakkale bridge, we are taking our place with approximately 1,000 trucks."Turfan added, "With our TruckMarket operations, which provide expertise, financing, guarantee and rental services in the 2nd hand market, we achieved an important momentum and we swapped 1,000 vehicles."

"Our sales upwards by 50% in international markets in 2017"

Speaking about the achievements and targets in international markets, Turfan also said that they opened 8 ea 4S facilities in 2017 with the new markets entered. "In 2017, we entered Romania, Hungary, Croatia and Israel markets in the European region which is very important for our export operations."

"We expanded to Egypt and Ghana last year apart from Algeria and Morocco. Most of our structuring in the Middle East had been completed by 2016. In 2017, we launched our satellite installations in Saudi Arabia and Iraq. In 2017, we launched the opening of our Georgia facility in the region of Turkic Republics.

In addition, we decided to realize a new dealership in Russia. We increased our sales in international markets by 50% compared to the past." he said.

Meanwhile, speeding up with new inaugurations of agents in the country and abroad, Ford Trucks opened Nas Bayii that serves in the fields of sales, spare parts, second hand vehicles in Mardin. Koç Holding's Vice Board of Directors Vice President and Ford Otosan Board of Directors President Ali Y. Koç said during the opening ceremony, "With the opening we have realized today, the number of 4S service plants has reached 29. We are going further with Ford Trucks and we aim to appear in 50 countries by the year 2020."

"Ecotorq motors developed with 100% Turkish engineering contribute much to our achievements"

Tufan stated, "Ecotorq motors, developed with 100% Turkish engineering, contributed much to our achievements in the growth and success of Ford Trucks in the international market, as well as in Turkey. Trucks with Ecotorq engines were launched on roads in China, the world's largest truck market, under the license agreement we made with the Chinese JMC brand.

We are also happy to have received the "Chinese Truck of the Year" award for this Truck equipped with Ecotorq engine developed by Ford Otosan engineers"

2017 year of digitization

Ford Trucks also took important steps in the field of digitization in 2017 with its new website, *Asistanım* and *Yolunuza Sağlık* applications.

Ford Trucks with new managing staff

Ford Trucks welcomed the new year with a new management structure. Serhan Turfan has been appointed Deputy Chief Executive Officer in Ford Trucks after retirement of Ahmet Kınay. Emrah Duman is continuing to fulfill the post of Director of Ford Trucks International Markets, and Burak Hoşgören has been appointed Director of Ford Trucks Turkey.

M. Armağan Hazar has been appointed as the Czech Country Manager of Ford Trucks, and Bahattin Topçu as Ford Trucks Marketing and Strategic Planning Manager. Aysan Hoşver has been appointed as Manager of Ford Otosan İnönü Factory .

FOREIGN TRADE DEFICIT \$76.7 bln IN 2017

According to the provisional data, produced with the cooperation of the Turkish Statistical Institute and the Ministry of Customs and Trade, in December 2017; exports were 13 bln 878 million dollars with a 8.6% increase and imports were 23 bln 84 million dollars with a 25.4% increase compared with December 2016.

In December 2017 foreign trade deficit was 9 bln 206 million dollars with a 63.5% increase compared with December 2016. In December 2017, exports coverage imports was 60.1% while it was 69.4% in December 2016.

Seasonally and calendar adjusted exports and imports increased by 1% and 12.2%, respectively compared with previous month. Calendar adjusted exports and imports increased by 11.8% and 29.6%, respectively compared with December 2016.

Exports to the EU up by 15,6 %

As compared with the same month of the previous year, exports to the EU-28 increased by 15.6% from 5 bln 657 million dollars to 6 bln 540 million dollars.

The proportion of the EU countries was 47.1% in December 2017 while it was 44.3% in December 2016.

In December 2017, the main partner country for exports was Germany with 1 bln 308 million dollars. The country was followed by the United Kingdom with 827 million dollars, Italy and Iraq with 771 million dollars.

The top country for Turkey's imports was Germany with 2 billion 191 million dollars.

The country was followed by China with 2 bln 122 million dollars, Russia with 1 bln 884 million dollars and USA with 1 bln 164 million dollars. Foreign trade by technology intensity covers the manufacturing industries' products in classification of ISIC Rev.3.

OTOKAR MAINTAINS ITS LEADERSHIP IN 2017...

The prominent commercial vehicle producer Otokar held a press meeting at which the year 2017 was evaluated along with the expectations from the new year.

Otokar's press meeting was attended by Otokar's high ranking managers **Basri Akgül, Murat Tokatlı, Tarkan Burak and Murat Torun.**

The meeting focused on the evaluation of the bus market, in which the widest part of Otokar's product range took place, as well as on the evaluations of the semi-trailer market with the distribution and service truck Atlas and Otokar's Fröheauf Brand.

Otokar, one of Koç Group companies, has reinforced its leadership in the bus sector. With different lengths of 7 up to 18.75 meters Otokar has the widest product range in Turkey. Deputy General Manager Basri Akgül, Domestic Market Commercial Vehicle Sales Director Murat Tokatlı, Otokar Marketing Manager Tarkan Burak, Otokar Domestic Market Commercial Vehicles Bus Sales Manager Murat Torun and Otokar's high-level executives participated in the meeting when the year 2017 was evaluated and the 2018 objectives were disclosed. Otokar, which has to date signed many firsts in the sector with its studies in the field of R&D, Industry 4.0 and digital transformation as well as the buses it has produced based on its 55-year experience, became Turkey's most favourable bus brand.

"Small and Medium Size Bus Market Up By 12 Percent

Otokar's Deputy General Manager Basri Akgül said that the bus market, which has been declining for the last 3 years, increased 4% in 2017 compared to 2016.

He said, "As Otokar, we have added new innovations to our success as Otokar. 2017 was a year full of innovations, efficiency for Otokar. The best growth in the market took place in the sector of small and medium sized buses. While the sector grew 4 %, the small and medium bus segment achieved 12 % growth. A significant portion of the sales in 2017 occurred in municipal bus sales and small bus segments. In 2017, Otokar realized a total of 488 ea bus sales and became the leader with a market share of 28% in the (25-passenger and over cap.) bus market." Akgül pointed out that 1 out of every 3 vehicles sold in the areas where they operate was Otokar brand. In the small and medium sized bus segment in which the most product sales took place in the bus market, two of every 5 buses were Otokar branded.

"New Breath into The Sector"

Akgül noted that, with the power gained from their R&D studies, Otokar launched different vehicles for the market in a short time based on the evaluation of user expectations and needs both in the country and abroad,

Akgül said, "The market requirements in the transportation sector are changing almost every year."

Akgül added that Otokar also promoted the new service and tourism bus *Poyraz* last year along with renovation of Sultan series and Doruk T, with the improvement of Sultan LF upon demand from customers "We are continuing to invest so as to develop products in a way to be able to meet expectations" .

"Our new buses have been highly acclaimed in recent years for their innovative designs, especially for low fuel consumption expectations, maneuverability, performance, handling, advanced technical and safety features for urban use. Our 8.4 m. Sultan LF has brought new breath to the urban passenger transportation. We made public bus deliveries to Malatya and İnegöl as well as to leading companies such as Altur, Gürsel Tourism, Efateur, Sözkur and Tursan."

"We Are Carrying the World"

Basri Akgül went to say that Otokar's achievement in exports continued in 2017 despite the challenging two years experienced by the sector.

He said "Otokar brand vehicles continued to strengthen their position in Europe with their design, comfort, technology, power and low operating costs,"

"In 2017, we exported approximately 70 million euros in commercial vehicles. Last year, our overall car park in France, Italy and Spain, our export countries, reached 2.500 units. We exported articulated 18,75m. Kent for the first time, thus starting a new era with its peculiar features in urban public transportation. Our car park in the Balkans owns more than 500 units. We can say that as Otokar vehicles are transporting millions of passengers in more than 60 countries, we are carrying the world."

"Growth Achieved in Light Truck Market"

Deputy General Manager Basri Akgül, noting that they aim to maintain Otokar's success also in the logistics area in 2018, said that Atlas was also among Otokar's renewed vehicles in 2017 and it brought a new breath to the segment of light trucks.

He said, "Our Atlas sales increased above the market growth. With Atlas, we raised our market share by 3 points in 2017 and reached a share of 11%. We have made important deliveries of Atlas trucks throughout the year as found favourable thanks to the vehicle's load carrying capacity, powerful hardware features, low

running costs, environmental friendly and economical engine.

We offer solutions in transportation that requires expertise in trailer production.

We are assertive in 2018 with our pioneering tools in accordance with international standards and regulations, with technology for hazardous substance transport and perishable food transport sectors."

"Our Goal is to be Pioneer in Digital Transformation"

With R&D, engineering capability, experienced and competent human resources as from the time when Turkey started industrialization and modernization leap in up to now Otokar has achieved many firsts.

Akgül noted that Otokar is carrying out 15 separate projects for the 4th industrial revolution, called Industry4.0, adding;

"With digital transformation projects, our stakeholders - from production to suppliers and to agents - will have a new, smart business platform.

This platform will give us speed in our customer specific product development processes. Our goal is also to lead the digital transformation journey in the sectors we operate.

We will continue to invest in robotic control in the upcoming period, from document management to skill-based optimization."

"Among our first are the first hybrid bus and the first electric bus of Turkey.

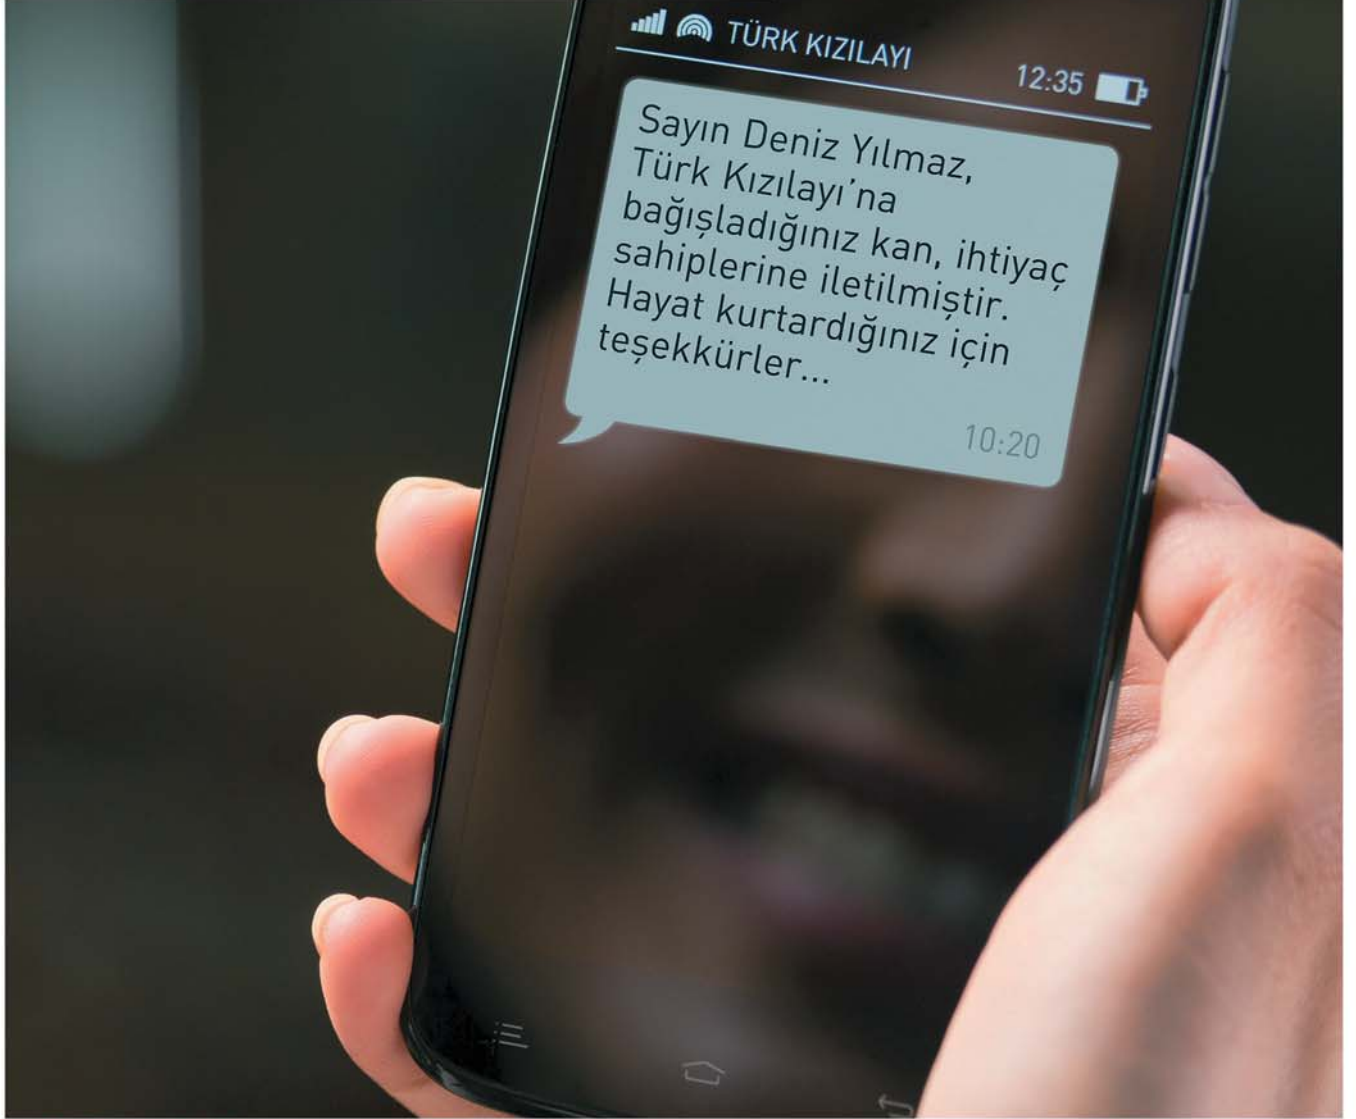

We will continue to work on alternative fuel vehicles that will provide a cleaner environment, lower operating costs and higher efficiency in 2018."

Akgül said that Otokar's Smart Bus Project, developed in collaboration with KoçSistem and İSBAK, under CoMoSeF, became the "Celtic Innovation Award Winner 2017".

HAVING HAD FURTHER STRENGTH IN 2017, MAN WELCOMES 2018 WITH INNOVATIONS, ADVANTAGES AND AWARDS...

Having further developed its market share at the declining 2017 market, MAN will continue to make a difference with its unique concept in 2018, as well as new models with matchless advantages, a security concept through advanced technology and expertise in EURO 6.

At the Busworld Kortrijk Fair, also known as the European Coach Week (ECW), MAN stand became the center of attraction for the organization.

MAN's fully renewed Lion's Coach (2 axle 12 and 2 axle 13 m.), NEOPLAN's *Tourliner* (2 axle 13 m.) and Skyliner 50th year travel buses were exhibited at MAN's stand, which received great interest.

At Busworld Kortrijk 2017, New MAN *Lion's Coach*, which was displayed for the first time, received great acclaim, and having had three of the awards given in 6 categories in 2017, it attracted great attention. In addition to the Grand Coach Award, new MAN *Lion's Coach* was chosen as the best in the categories of Comfort Label and Design Label.

MAN reached 22% market share in the bus market last year. With its models that make up the higher class in their segments, mainly 2 -axle 13 m. new generation MAN *Lion's Coach* and again 2 -axle 13 m. version of NEOPLAN *Tourliner*, MAN will continue to appear with distinction in Turkey in 2018. By end of November 2017 MAN reached the sale of 129 ea vehicles and with its new models, it aims to raise both the sales and market share in the new year. In the narrowing 2017 market,

MAN managed to improve its market share upwards, and will continue to make a difference with its unique concept in 2018, as well as new models with matchless advantages, a security concept through advanced technology and expertise in EURO 6.

The leading brand of heavy commercial vehicles, *MAN Truck and Bus Co.* held its traditional meeting on 12 December to share the evaluations for 2017 and expectations from the new year.

The hosting managers were Director of Bus Sales Department **Can Cansu**, Director of Truck Sales Department **Serkan Sara**, Director of Second-Hand Sales Department **Aydın Yumrukçal** and Post Sale Services Director **Şinasi Ekinciöğlü**.

BUS

Having further raised its market share at the declining 2017 market, MAN will continue to make a difference with its unique concept in 2018, as well as new models with matchless advantages, and a security concept that has been created through advanced technology, and MAN's expertise in EURO 6.

At the Busworld Kortrijk Fair, known as the European Coach Week, MAN's stand dazzled the visitors with its fully renewed *Lion's Coach* (2 -axle 12 and 2 -axle 13 m.), NEOPLAN's *Tourliner* (2 -axle 13 m.) and Skyliner 50th year travel buses were exhibited at MAN's stand, arousing great interest.

New MAN *Lion's Coach* was displayed for the first time at Busworld Kortrijk 2017 and received great applause, and it marked the contest by gaining three of the awards given in 6 categories in 2017. In addition to the *Grand Coach Award*, new MAN *Lion's Coach* was chosen as the best in the categories of Comfort Label and Design Label. MAN reached 22% market share in the bus market last year. With its models that make up the higher class in their segments, mainly 2 -axle 13 m. new generation MAN *Lion's Coach* and again 2 -axle 13 m. version of NEOPLAN Tourliner, MAN will keep on being distinctive in Turkey in 2018, too.

By end of November 2017, MAN reached the sale of 129 ea vehicles and with its new models, it aims to increase both its sales and market share in the new year.

MAN raises share in travel bus market

Director of Bus Sales Department Can Cansu evaluated the year 2017 and shared his views on the new year forecasts. He pointed out that the year 2017 witnessed a serious shrinking compared to the previous year. Cansu said: "As MAN, we are able to get a share of 22% according to data by end of November. The sector is almost entirely turning to the 2+1 VIP bus. In order to meet the sector's expectations, we are launching our new products, 2 -axle 13 m. new MAN *Lion's Coach* 2+1 seat brands, which comprise 41-passenger capacity and 2+2 seat brands 55-passenger capacity."

Its even more confident new look exudes power and efficiency, and it is impossible to miss its technological enhancements. The optimised driveline and innovative assistance systems guarantee you enhanced engine performance, even though fuel consumption is reduced. With the addition of the new 13-m. version over two axles, MAN has extended its *Lion's Coach* portfolio to ensure that your fleet is optimised for use. *Lion's Coach* will continue to be the most demanding model with all these unique advantages offered by its renewed face.

The new Neoplan Tourliner will continue to be the most attractive model of the premium bus segment, with a new version of 2 axles 13 m. long.

Success going on at public sales

Public procurements which started fast in 2017, however slowed down in the second half. MAN's public sales unit sold 200 units in 2017 in direct deals. As in previous years, MAN continues to be the preferred choice for the segments in need of special-purpose and multi-featured vehicles.

When the distribution of sales are considered, it is seen that the main item consists of cranes, dumper and double pull tractors that will work under heavy conditions after the fire group.

TRUCK

MAN again comes first in Imported Truck Market

MAN, having improved its market share in the 2017 market, will continue to create difference with its unique concept in 2018, as well as new concept models with unequalled advantages, a security concept it has developed based on advanced technologies and its proficiency in EURO 6.

MAN, which is in a brand position that has elevated the market share in the Turkish truck market, has had its leadership certified in the area of customer satisfaction by means of surveys of independent research companies. By the end of October 2017, 12 -ton truck market witnessed a serious shrink..

Director of the Truck Sales Department Serkan Sara said that a narrowing by 6% was observed in the truck market by end of October as compared to the same period of previous year, adding that MAN Truck is the brand that maximizes its market the most share in terms of sales figures shared by TAİD in 2017.

Sara underlined, "MAN is making a difference in every field with its customer-oriented production approach.

The *EfficientLine* series developed with this approach shapes the sector with our superior features and additional solutions that we offer to our customers in our new series Euro 6C vehicles."

TURKISH CONTRACTORS' UNDERTAKINGS GAIN MAJORITY IN HOUSING SECTOR WORLDWIDE

According to the Economy Ministry, the Turkish contracting services undertook 9,258 projects worth \$ 354 bn648 mln in 119 countries as from 1972 until the end of 2017. The report says that Turkish contractors' undertakings abroad only last year reached 241 projects worth 14 bn666 mln dollars.

In the regional distribution of the works undertaken abroad from 1972 until the end of 2017, the Independent States Community and the Middle East countries came forward. In this period, Russia took the first place with a share of 19.4 % in the projects undertaken abroad. In this country, 68 bn788 mln dollar worth of business was undertaken. Turkmenistan followed with 13.2 % and a value of 46 bn844 mln dollars.

Tanzania goes ahead traditional markets for the first time

Turkish contracting firms undertook 190 projects in 56 countries, amounting nearly 13.6 bnUSD in 2016. With a total share of 42.8%, Qatar, Saudi Arabia, Russian Federation and Uzbekistan were the leading markets followed by Bahrain, UAE, Kuwait, Senegal, Pakistan, Ukraine. The total value of the projects completed in 2016 was quite low compared to the last three years. This situation was mainly explained by political and economic difficulties recently experienced in the North African, Middle Eastern and Eurasian countries which are the most important markets for the Turkish contractors. Especially unfavorable developments in Iraq and Libya, which have always been among the top markets for Turkish contracting, is thought to be the main reason for this decline.

Tanzania took the first order with a 17.3 % share and a project worth 2 bn531 mln dollars in foreign contracting works undertaken last year and followed by Saudi Arabia with a 14.1 % share and a 2 bn72 mln dollar project. Projects undertaken in Russia had a 12.1 % share with 1 bn771 mln dolar volume.. The projects for the United Arab Emirates were the fourth with a share of 9.1 % and a Project value worth 1 bn331 mln dollars. For the first time, a sub-Saharan African country has emerged as the most project-bearing country, ahead of traditional markets such as the Commonwealth of Independent States and the Middle East. The first place in the list of projects that Turkish contractors have undertaken so far is housing projects. In this sector, 46 bn865 mln dollars of undertaking was carried out.

Housing projects are followed by roads, tunnels and bridges with a volume of 45 bn743 mln dollars, and commercial center constructions with 29 bn396 mln dollars.

New target market Sub-Saharan Africa

According to the report of the Ministry, the number of countries whose projects have been undertaken in recent years has increased to 119 with the addition of Liberia, Chad, Rwanda, Sri Lanka, Czech Republic, Estonia, Madagascar, Malawi and Vietnam to traditional markets like the Middle East and the Commonwealth of Independent States. Ethiopia, Nigeria, Mozambique and Ghana have appeared to be the priority countries as a result of "target country" studies on the Sub-Saharan Africa under scope of the Ministry's activities.

2018 MINIMUM WAGE RAISED TO NET 1603 TL

The minimum wage was raised by 14 percent in 2018, for a monthly minimum wage of 1,603 liras (\$423.30), Minister of Labour and Social Security Jülide Sarieroğlu said. "We have made a 52 percent raise in the minimum wage on a cumulative basis over the last three years," said Sarieroğlu. The new gross minimum wage, before deductions such as social security premiums and income taxes, is 2,029 liras (\$534.6).

Minimum wage negotiations started in early

December with the participation of employer unions, worker unions and the government. The final wage was determined after a round of four sessions in total.

According to the newly determined minimum wage, a worker married with 3 children and whose wife is not employed will receive 1.709 TL. In a statement made by the Ministry of Labour and Social Security, the minimum wage will be valid from January 1, 2018 and it is determined as 2.029 TL gross and 1.603 TL net.

TURKEY'S 2017 CEMENT AND CLINKER FIGURES HAVE BEEN ANNOUNCED

■ Last year 80.5 million ton cement, 70.8 million ton clinker produced...

■ 7.9 million ton cement exports made during the 12-month period

The Private sector cement mills of Turkey are reported to have produced 80 mln 552. 257 ton cement by end of December 2017.

According to the data from the *Turkish Cement Suppliers Association*, Turkey's monthly cement production has been realized as 6.7 million ton on average. Of the total production, 7 mln 980.441 ton part was exported last year. ,The rest was consumed domestically. As is the case in previous years, Marmara factories produced (20 mln 566.157 ton) the most

cement and it is followed by the factories in the Mediterranean region with 18 mln 065.630 tons.

Meanwhile, Central Anatolian factories produced 13 mln 954.949 tons and Southeast Anatolia factories 6 mln and 104.692 tons and Aegean factories 6 mln and 37.811 tons..

By end of December 2017, the Factories in the Black Sea Region produced 9 mln 331.977 tons whereas those in the East Anatolia produced 6 mln 491.041 tons of cement.

EMLAK KONUT GYO'S SALES REACH A TURNOVER OF 7.7 BILLION TL IN HOUSING LAST YEAR

Closing the year 2017 with a sales turnover worth 7.7 billion TL, Emlak Konut GYO aims to maintain its success in 2018.

Emlak Konut GYO announced that the company realized a sales volume of 7.7 billion TL (VAT excluded) in housing sector, with the size of 1.1 million square meters between January 1, 2017 and December 31, 2017.

2017 targets kept up to a great extent

Emlak Konut GYO General Manager Murat Kurum, evaluating the figures of 2017, said that they considered the 2017 as a period of recovery and revival after a difficult process and turmoils which experienced in the country in 2016.

Kurum said: "We said early 2017 to be hand in hand for a powerful Turkey and with the help of financial institutions we also reached record sales figures in a very short time. In the rest of the year, we provided opportunities such as different payment options or debt closures in our projects in order to support the positive momentum of the sector. When we look at the present, we see that we achieved our targets at the beginning of 2017 to a great extent.

In 2017, we reached sales of facilities in size of 1.1 million square meters, at a value of 7.7 billion TL. We also target to obtain a net profit of 1.8 billion TL in 2017."

With 9 revenue share tenders, a value worth 13 bln TL in 2017

General Manager Kurum evaluated the other activities of Emlak Konut during the year, together with the performance of the sector, adding that the real estate sector and the country's economy, which together make up the whole, showed how resistant they are to the external factors in 2017.

"When we examine the TÜİK data, we can see that the first and second hand sales of housing realized in total in 2017 were above the figures of previous year. The 3rd quarterly growth figures indicate that our economy had a growth rate of 11.1%.

This ratio is also the highest among the 3rd quarter values announced in all the countries of the world.

Again in 2017, the dream of the domestic automobile turned into a concrete project. Export figures reached the satisfactory levels and the 2nd highest export level has been reached of the history of the Republic.

We can say these figures very easily, but we can see that it is really a great administrative success. In our capacity to support this endeavor of our state, we also carried out many activities during the year apart from the housing sales.

When we look at our activities in the year 2017, we realized the purchase of land worth 1.27 billion TL. Our company completed various large-scale projects in 2017.

The projected sales rate in 2017 indicate that the rate reached 95%. In 2018, the sales rate in our projects planned for delivery has already reached 74%."

Emlak Konut to obtain a profit of 1.8 bln TL through its sales worth 7,2 bln TL in 2018

General Manager Kurum, who made a sector evaluation for 2018 and explained the company targets, pointed out that they want to continue this success that has been caught after a successful year.

Kurum said, "Our industry is one of the most important wheels of the country's economy. The Real estate sector that contributes to many subsidiary sectors also provides serious support to employment. We believe that our sector will, in a locomotive position, keep on its investments in the new year.

We plan to open tender for our plots out of our outstanding portfolio with a total of TL 5.3 billion worth of land, which attracts attention with the central locations such as Küçükçekmece, Şişli, Bakırköy, Florya, Çekmeköy and Bahçekent in Istanbul.

We will also carry out auctions in Ankara Saraçoğlu and Samsun. We plan to create a business volume of 10 billion TL with the land values of about 2.1 billion TL.

We are planning to launch our projects in 2018, which we realized in 2017 after their permit transactions. We have a sales target of TL 7.2 billion for this segment in 2018. In addition, we aim to sell 830 thousand m2 of independent sections and obtain a net profit of TL 1.8 billion in total this year "

TURKISH AUTOMOTIVE INDUSTRY FIGURES FOR JANUARY-DECEMBER 2017 ISSUED

Turkey's overall automotive production rose by 13% amounting to 1-mln 674.000 units and automobile production by 18% amounting to 1 mln 121.000 units in 2017 as compared to 2016,...

The *Automotive Manufacturers Association (OSD)* has issued its 2017 automotive sector figures.

Turkey's total automotive and automobile production is reported to have increased 13 percent to 1.7 million and 18 percent to 1.1 million, respectively, an all-time high for the industry in 2017

In Turkey last year, the total automotive production increased by 13 percent to 1.7 million compared to 2016, while automobile production reached 1.1 million with an increase of 18 percent, providing the sector with the highest levels in both total automotive and automobile production.

The Automotive Manufacturers Association (OSD) announced its annual production results covering the January-December 2017 period.

With these figures, both total automotive and automobile production reached their highest levels in Turkey. Including tractors, total production reached 1.7 million units last year.

Last year, production rose by 3 percent in the commercial vehicle group, 2 percent in the light commercial vehicle group and 23 percent in the heavy commercial vehicle group.

While this change in heavy commercial vehicles was driven by a base effect, production decreased by 32 percent.

80% of Production Exported

In 2017, total automotive exports increased by 17 percent and automobile exports by 24 percent compared to the previous year. In this period, total exports amounted to 1.3 million units, followed by automobile exports with 921,000 units. Thus, 80 percent of the total production in the automotive industry was exported.

In the same period, total automotive exports increased by 20 percent to \$29 billion, which corresponded to 25.7 billion euros with an increase of 17 percent.

Automobile exports, on the other hand, increased by 41 percent to \$11.8 billion, which amounted to 10.5 billion euros with an increase of 39 percent. Tractor exports also decreased by 4 percent compared to 2016, reaching 13,123 units.

In this period, main industrial exports increased by 25 percent and subindustry exports by 10 percent in dollar terms.

According to the Turkish Exporters Assembly (TİM) data, total automotive industry exports maintained the leading position in 2017 with an 18.2 percent share in exports.

Rise in Domestic Production Sales in Local Market

In 2017, the total market decreased by 3 percent to 980,277 units. In this period, the automobile market narrowed by 5 percent to 722,759 units.

Last year, the commercial vehicle market and light commercial vehicle market grew by 3 percent compared to the previous year, while the market maintained the same level in the heavy commercial vehicle group.

The market contraction in the heavy commercial vehicle group reached 44 percent in the last two years.

The market share of imports in automobile sales was 70 percent in 2017.

In 2017, total automobile sales decreased by 5 percent and imported automobile sales by 10 percent compared to the previous year, while domestic automobile sales rose by 13 percent.

The recently introduced automobile projects had a significant effect on the increase in the share of domestic production in the automobile market.

The market share of imports in light commercial vehicle sales, on the other hand, stood at 47 percent. Last year, total light commercial vehicle sales increased by 3 percent, domestic light commercial vehicle sales by 4 percent, and light commercial vehicle sales by 2 percent compared to 2016.

In 2017, the heavy commercial vehicle market maintained the same level compared to the previous year, reaching 24,083 units. In the same period, the truck market increased by 1 percent to 21,067 units, and the minibus market by 5 percent to 2,120 units, while the bus market decreased by 34 percent to 896 units.

BANKING SECTOR'S FORECASTS IN 2018

In the banking sector, the fastest growth in recent years has been recorded with credits backed by KGF (Credit Guarantee Fund). While the KGF effect in 2018 is not expected to be so high, it is still expected to grow by around 15 percent.

The banking sector, which has achieved the best credit growth in recent years with the credits supported by the Credit Guarantee Fund, is not anticipated to grow at the same pace in 2018, high deposit costs and declining mortgage loans will be high on the agenda.

While the credit growth expected in the Turkish banking sector at around 22 percent with the momentum created by credits supported by the KGF in 2017 shows the highest performance in recent years, it is expected that this will be reflected positively in the profit of the sector. According to the BDDK data, the sector loans reached 2.05 trillion TL at the end of October and net profit 41.2 billion TL in Jan.-Oct. period with an increase of 28.3 percent.

13-15% Credit Growth Foreseen

By the end of November, about 221 billion TL worth of loan volume was made available under the KGF, and it is envisaged that the credit growth will take place in the range of 13-15 percent, although not so much as in 2017, with the continuing implementation of the KGF this year.

"The marginal impact of the KGF will not be the same this year," said Sadrettin Bağcı, Deniz Yatırım Banking Analyst.

He added, "The limit was 250 billion TL and most of it was disbursed, and probably the realization will be as much as half of this amount."

Expressing that the interest rates of deposits increased a little more in the last quarter, after an increase because of the effects of KGF, Bağcı noted that they predict to see them to be at high levels in the first quarter. He said, "While the rise in deposit rates, which is at the level of 13 percent nowadays, kept its place on the agenda throughout 2017, the economic administration called for banks to cut interest rates at every opportunity. Housing sales have been reduced in recent months and that the demand is below the supply. And another issue high on the agenda in 2018 will be the weakness in the demand for housing loans."

"Demand for mortgage loans is also weak. The demand for housing loans may weaken because housing prices are not rising, which may slow down

lending to the construction sector. Secondly, it may also be seen as an active asset, perhaps just like a KGF for home loans, or it may be incentives to vitalize the housing sector", Bağcı said.

The Housing Developers and Investors Association (Konutder) Chairman Altan Elmas said that at least 10 percent of the sector's losses has been experienced since the beginning of the year due to the reluctance of banks to extend housing loans and that housing sales were being further suppressed with the rise witnessed in loan rates in the last quarter.

"Deposit costs and swap balancing the most important topics"

Global Securities Banking Analyst Kerem Mimaroglu said that the growth rate of the banking sector could be around 15-16 per cent in 2017, which is expected to be around 22 per cent this year. There may be a similar picture in deposits, too. He noted that the costs of deposits and swap balances are the most important topics to be monitored

Over 200,000 companies benefited from KGF scheme

In March last year, Turkey raised the volume of the KGF by more than ten-fold to 250 billion liras in line with measures to boost the economy. Turkish businesses showed a great interest to this type of financial support, adding that a total of 202,000 companies had used 197 billion liras (\$50 bln) of loans under this scheme so far.

The Credit Guarantee Fund was established to support small and medium-sized enterprises and to provide collateral to enable them to use bank loans in financing their investments and operations.

Meanwhile, the Turkish banking sector posted a 4.5 billion TL (\$1.2 billion) net profit in January 2018, according to the Banking Regulation and Supervision Agency (BDDK). In January, the net profit of the sector recorded a 22.7 percent rise year-on-year, compared to 3.7 billion TL (\$974 mln) net profit in the same month of last year. Last year, Turkish banking sector's net profit hit its all-time high, reaching 49.1 billion TL (\$13 bln) with a yearly increase of 30.8 percent.

Loans given by banks — the biggest sub-category of assets — stood at 2.1 trillion Turkish liras (\$564.8 billion) at the end of January marking a 17 percent yearly increase. Deposits held at the country's banks amounted to 1.7 trillion Turkish liras as of January, indicating a 14.3 percent rise on a yearly basis.

EXPORTS IN TURKISH LIRA RISE FIVE FOLD IN 7 YEARS

The share of TL in total exports, which was 2.3 percent in 2010, became 9.2 percent in 11 months last year ...

The share of TL in foreign trade with the countries that Turkey have agreed in recent years is gradually increasing.

By the end of November 2017, the share of TL in total exports between 2010 and 2017 increased 5 times compared to 2010 and reached 13 billion 173 million dollars.

In the same period, TL-denominated imports have nearly tripled to 16 billion 463 million dollars. The euro, the most widely used currency type, has risen above dollar in exports since 2016. During the 11-month period of 2017, the share of euro in exports increased to 47.7%.

As Trading with local currency reduces countries' foreign exchange requirements, especially in foreign currency-dependent countries, currencies provide a significant advantage at the point of preventing speculative movements.

This situation also allows the exporters to see ahead, while at the same time preventing the increase in the current account deficit, which is one of the important elements of the economy.

Turkey, being seriously determined in this regard in recent years, began to take the fruits of the efforts exerted. At meetings with the leaders of countries that do not have dollars or euros, President Recep Tayyip Erdoğan brings to the agenda the rise of the amount of trade that countries mutually make through their own currencies

Especially at meetings with Russia and Iran, trade with local currencies was added to the reconciliation texts. Trade with local currencies finally came to an end at the D-8 summit in Istanbul in October 2017. Speaking at the summit, Erdoğan said the \$100 -billion trade volume between the member countries should be raised to \$ 500 billion

At this meeting, it was agreed that local currencies should be used in trade among the D8 countries. Through Turkey's initiatives the D8 was established in 1997 with Iran, Pakistan, Bangladesh, Malaysia, Indonesia, Egypt and Nigeria as well as Turkey.

According to the compilation from TÜİK data, 2 billion 640 million TL part of the exports, which reached 113.8 billion dollars in 2010, was realized in TL and the share of TL in exports was 2.3 percent.

In 2011, 2.54 percent of the 134.2 billion dollar worth of exports, corresponding to 3 billion 433 million dollars, was realized with TL.

In 2012, the 4 billion 490 million dolar portion of 152.4 billion dollar exports was in TL, which accounted for 2.94 percent share in the overall exports.

In 2013, the share of the trade in TL within the 151.8 billion dollar total exports rose to 3.52 percent.

In 2014, 4.24 percent of the 157.6 billion dolar exports was made in TL (6 billion 695 million dollars)

While in 2015, the share of TL in the 143.8 billion dolar exports increased to 4.25 percent (6 billion 90 million dollars).

In 2016, the share of TL became 7 bln 877 mln dollars, which meant 5.52 percent, within the overall 142.5 bln dollars. During the 11 month period of 2017, the 13 bln 173 mln dolar portion of the 143.2 bln dolar exports was realized in TL, which corresponds to 9.19 percent .

The share in imports 8 percent

The share of TL in imports is also increasing. While 3.1 percent of the imports worth 185.5 billion dollars in 2010 were made in TL, 3.1 percent of the imports worth 240.8 billion dollars in 2011 was realized in TL. The share of TL in imports reached 4 percent in 2012, 4.5 percent in 2013, 5.1 percent in 2014, 6.5 percent in 2015 and 7.2 percent in 2016.

During the 11 month period of 2017, 7.8 percent of the imports worth 210 bln 703 mln dollars was carried out (16 bln 463 mln dollars).

Dollar, which had been in the first place in Turkey's exports since 2013, was replaced by euro after this time.

The share of euro in exports in 2010 was 48.2 percent, 47.7 percent in 2011 and 47.6 percent in 2012 The share in 2013 reached 45.6 percent.

In exports, the euro received a 44.4 percent share in 2014 and 44.6 percent in 2015.

The share of the dollar was 45.4 percent in 2010, 46 percent in 2011 and 2012, and 47.4 percent in 2013 and 2014.

In 2016, the euro once again moved forward. In 2016, the share of euro in exports was 48.2 percent, while the share of dollar was 42.6 percent. In January-November 2017, euro received 47.7 percent and dollar 39.4 percent.

In imports, the dollar has a clear superiority.

PUBLIC ALLOCATION 8.5 BLN TL TO TWO SECTORS

The total amount of investment allocated to the energy and mining sectors by the public has reached 8 billion 512 million liras, an increase of about 25 percent compared to the previous year. According to the 2018 Investment Program, of the investments to be realized this year, 5.706.217.000 TL has been allocated to 155 projects in the energy sector and 2.805.790.000 TL to 58 in the mining sector.

The Turkish Electricity Transmission Co. (TEİAŞ) has the largest share of the energy investment.

A total of 2.850.000.000 TL investment budget has been allocated for its projects which are going on and will start this year.

DSİ Comes Second in Distribution of Financing

TEİAŞ will carry out a total of 97 projects. It is followed by the State Hydraulic Works (DSİ) with 12 projects. DSİ has received a financial source of 1.603.000.000 TL.

The Electricity Generation Co. (EÜAŞ) comes 3rd with its share in energy investments.

EÜAŞ has received 1 billion TL for 15 projects.

Majority of Financing to TPAO in Mining

In the Mining sector the highest share of financial source has been obtained by the Turkish Petroleum Corporation (TPAO).

For its ongoing and new projects, a total of 1.599.616.000 TL investment budget has been allocated in 2018. TPAO will carry out a total of 13 projects. For its new projects a total financing of 1.168.313.000 TL has been reserved.

The second largest share of public investments in mining has been obtained by the Mineral Research and Exploration General Directorate (MTA).

For 7 projects, a total of 450.706.000 TL has been allocated to MTA. EÜAŞ comes third with the share of public investments in mining. For 11 projects it will receive 240.380.000 TL.

In the last year's investment program, the energy and mining sectors had received a total financing of 6.799.067.000 TL.

GOVERNMENT'S SPECIAL INCENTIVE MECHANISM TO BE PUT INTO FORCE

The Economy Ministry has disclosed the *Input Supply Strategy (GİTES) Action Plan* prepared for the 2017-2019 period with the objective of promotion of investment in inputs that are highly imported by Turkey, and production of export-oriented high-technology products. The government is set to announce a number of projects totaling almost TL 80 billion (\$21.2 billion), Economy Minister Nihat Zeybekci said. He confirmed that the projects, which are part of the government's Project-Based Support System or "super incentives" would be made public in the ensuing period. Zeybekci announced that the ministry prepared the decisions of the Council of Ministers under the program of Centers of Attraction and that some of the investment incentives in 23 provinces will be evaluated within this scope of the sixth region incentives. The projects are chosen from seven sectors in which Turkey is highly dependent on imports. "We needed to have a project-based incentive system to create our own 'giants' in sectors where we are in need of technology transfer and show a current account deficit," he said. The investment incentives will

include exemption from income and corporate tax for 10 years as well as government support on employee insurance premiums and financing interest rates.

The Minister said, "We determined seven sectors. Turkey shows a current account deficit in transportation, health, communication, energy, metallurgy, petrochemistry and the agricultural technology sectors. Turkey is also short of technology in these sectors."

Priority to R&D for Driver Assistant Systems

R&D activities will be primarily supported by joint research with TÜBİTAK for the production of inputs with high imports. Within this scope, R&D priority products include alternative inputs such as biopharmaceuticals, advanced material technologies, sensor technologies for the automotive subsidiary, drive assistant systems. The existing research infrastructure in the fields of electronic and embedded software with priority designation will be strengthened. Project invitations will be announced in the areas of vehicle dynamics and control, smart transport systems, automotive sensors and algorithms.

2018 WILL BE YEAR OF TAX REFORMS

The Ministry of Finance aims to legislate four separate legislative acts as tax reforms after submitting to the Turkish Grand National Assembly in 2018. With the amendment to be made with four separate laws in 2018, it is expected that a step will be taken on tax reform, as has been on the agenda for a long time.

The Draft Laws on Income Tax, Tax Procedures, Value Added and Istanbul Finance Center constitute the piers of the tax reforms mentioned frequently by Finance Minister Naci Ağbal during the budget debates.

A simple, more competitive and growth-friendly tax system is envisaged with the legal regulations planned to be put into effect by the economy administration in 2018.

Two tax laws to be combined

First, the Law on Income and Corporation Tax will be merged. The Ministry of Finance, aiming to refine the Income Tax Law, which has been in effect since 1961, under a comprehensive reform, is continuing studies on this draft. The Ministry, which received views from non-governmental organizations, also examined the implementations in other countries.

The Income Tax law draft studies have been completed on a large scale, and a taxpayer-focused taxation system has been targeted to expand the tax base, facilitate tax compliance, improve predictability, increase investment and value-added production.

VAT to drop in investments

Another regulation to be reformed is the Value Added Tax Law.

The economy's management, which explains that the Value Added Tax Law will reduce the tax compliance costs, encourage domestic production and investment, through an approach that removes the burden of VAT on investment, production and export, is planning an arrangement that will reduce the costs of SME's compliance with the tax, decrease the burden of additional financing due to the VAT on investments.

Examining the VAT system in the United Kingdom, compiling the suggestions from the relevant sectors, the Ministry of Finance aims to apply the UK's flat-rate tax system to SMEs Turkey.

The Finance Ministry's 2018 agenda also includes the Draft Law on Tax Procedures and the Istanbul International Finance Center Draft Law.

The new Tax Procedure Code will be designed to resolve the disputes in a short time and to provide a deterrent structure to raise the voluntary compliance in the tax penalties.

With The Istanbul International Finance Center Draft Law, arrangements will be made for the improvement of the necessary legal, physical, human and tax infrastructure to ensure the development of the financial system in Turkey in order to transform Istanbul into a regional and global financial hub.

ARRANGEMENT ON KGF LOANS

A new Treasury-backed credit tranche was put into by the Turkish Government in the Official Gazette dated 1 January 2018, in an effort mainly to spur growth in manufacturing and export sectors.

The related protocol for the use of a 55 billion lira scheme, including 5 bln in returns, was signed by officials from the Credit Guarantee Fund (KGF) and the Treasury. Turkish companies have already borrowed around 200 billion liras under the plan, but the remaining part of the scheme was not open to use until now. Deputy Prime Minister Mehmet Şimşek said almost half of this amount, 25 billion liras, of credits would be used by the manufacturing sector and some 15 billion liras by Turkey's exporters. Şimşek said the credit scheme was an effective policy tool.

"Some 50 billion liras of this amount are composed of new warrants and the remaining 5 billion lira is of returns," he added. Saying that the new scheme would be used to realize Turkey's main macroeconomic priorities, Şimşek added: "In an effort to put the current account deficit at sustainable and manageable levels, we have prioritized some investments. In this vein, some 25 billion liras of credits will be used by the manufacturing sector and 15 billion liras by the export sector. Thus, we will allocate almost two-thirds of the new credit scheme to spur Turkey's production power."

Şimşek said that Turkish businesses showed a great interest to this type of financial support, adding that a total of 202,000 companies had used 197 billion liras (\$50 billion) of loans under this scheme so far.

DEVELOPMENTS IN AGRICULTURE IN 2017

Some of the developments in the Turkish agricultural sector in 2017 are summarized in the following chapters:

1- According to the Turkey Statistical Institute (TÜİK), Turkey's economy grew by 7.4 percent, agriculture grew 3.3 percent in the same period in the first 9 months of 2017. The difference is much bigger in the third quarter of the year. Growth in economy in the third quarter was a record 11.1%, while growth in agriculture was only 2.8%.

2- The agricultural subsidy budget was determined at 12.8 billion TL for the year 2017. Agricultural subsidies were published in the Official Gazette dated August 18, 2017 and entered into force.

3- The National Agriculture Policy was put into practice as of 1 January 2017. The Basin-based Subsidy Model for crop production supported 21 products identified in 941 basins. Subsidy payments have been paid in two installments.

4- In 2017, defined as "golden year" in agricultural imports, in the framework of the food price reduction and inflation program, customs taxes were reduced or zeroed in cereals, pulses, feedstuffs, livestock and red meat trading.

5- The Meat and Milk Institute was authorized to make imports in Livestock and red meat business, and the State Grain Board (DMO) in cereal products with zero import duty.

6- While the harvest was beginning in agriculture, a Cabinet Decision was published in the Official Gazette dated June 27, 2017, stipulating customs duty reductions as follows: from 130 to 45 per cent for wheat imports, to 35 per cent for barley, to 25 per cent for corn. Meanwhile, the same decision stipulates customs duties to be reduced from 135 to 26 percent for livestock (cattle) imports and from between 100 to 225 percent to 40 percent for Carcass meat.

7- According to the decisions of the Council of Ministers published in the Official Gazette dated 22 November 2017, the rates of customs duties were rearranged with products including animal feeds, oilseeds, medicinal plants, forage and coarse fodder.

8- With the decision of the Council of Ministers published in the Official Gazette dated December 2, 2017, the customs duty was also nullified in the import of chickpeas, dried beans, shell beans and cowpeas species. The application will last until 1 June 2018.

9- Within the scope of the amendment made in the Council of Ministers, Food, Agriculture and Livestock Minister Faruk Çelik transferred his duty to Ahmet Eşref Fakıbaba in July.

New Minister Fakıbaba changed both the position and the politics and focused on red meat in the directives of President Recep Tayyip Erdoğan to sell cheaper meat to people.

10- Ziraat Bank was transferred to the Asset Fund. The bank had been meeting 60 per cent of the loans granted in the agricultural sector alone, with agricultural subsidies for farmers and many other agricultural services.

11- In 2017, as in the previous year, the effects of the tomato crisis with Russia dominated the markets.

12- The State Grain Board intervened in the hazelnut market after 8 years. DMO had been authorized to purchase hazelnuts for the first time in the 2006-2007 season by the Council of Ministers and after three consecutive seasons of hazelnut it resigned from the market.

13- Although production and use of Genetically Modified Organisms (GMO) is prohibited in Turkey, it was found in a loaf of bread produced in Adana.

14- Turkey imported forage again 5 years later in 2017.

15- The Republican People's Party held farming meetings in different regions of the country and carried the product-based problems of farmers on the agenda.

16- The Malatya apricot was awarded the EU geographical registration.

17- The Ministry of Food, Agriculture and Livestock published the 2018-2022 Strategic Plan.

18- The draft bill for olive fields to be opened for mining investments and reconstruction was rejected for the 7th time in the Turkish Grand National Assembly.

19- The biggest olive oil museum in the world, "Köstem Olive Oil Museum" was opened in İzmir Urla.

20- A terrible cyclone caused tens of millions of liras in Antalya.

21- Mahindra bought *Erkunt Tractor*, which is 100% domestic.

22- ChemChina bought Swiss-based *Syngenta*, one of the seed giants of the world.

23- The Sugar Foundation and the Tobacco and Alcohol Market Regulatory Authority were closed down and transferred to the Ministry of Agriculture.

SEEs TO MAKE 20 bln TL WORTH OF INVESTMENTS IN 2018

The *State Economic Enterprises (SEEs)* and the affiliated managements are envisaged to make investments worth around 20 billion TL in 2018. The Council of Ministers decision on the State Economic Enterprises and their affiliates' General Investments and Financing Program for 2018 has been published in the Official Gazette. According to the Gazette, measures will be taken to raise efficiency and profitability in all the operational activities. An effective human resources policy will be followed.

SEEs' 2018 Financial Targets

Meanwhile, State Economic Enterprises (SEEs) are envisaged to make investments worth 20.042.088 TL.

The highest one worth 7.5 billion TL will be realized by TCDD followed by BOTAŞ with 3.4 bln TL and Turkish Electricity Transmission Co. (TEİAŞ) with 2,9 bln TL. The lowest investment will be made by TETAŞ with 1.8 million TL.

State Economic Enterprises' 2018 Financial Targets (000 TL):

Enterprises and affiliates that are subject to Decree Law no 233	Investment	Borrowing Requirement (1)	Primary Surplus (2)
1 - Machinery and Chemicals Industries Co. (MKEK)	242.000	-37.767	35.567
2- Eti Mines General Directorate (ETİ MADEN")	417.000	113.312	-135.312
3- Turkish Hardcoal Enterprise Kurumu (TTK)	160.000	1.004.985	20.015
4- Turkish Coal Works (TKİ)	141.231	665.015	331.992
5- Electricity Generation Co. (EÜAŞ)	1.240.380	708.779	-815.179
6- Turkish Electricity Transmission Co. (TEİAŞ)	2.850.000	-3.040	13.954
7-Turkish Electricity Trade & Commis.Co.(TETAŞ)	1.800	-9.200	-47.030
8-Turkish Petroleum Corp. (TPAO)	1.601.000	226.314	301.575
9-Pipelines and Oil Transport Co. (BOTAŞ)	3.367.000	3.886.038	-3.936.423
10-State Grain Board (TMO)	68.508	914.740	88.895

Employment for the SEEs

In cases where it is not possible to meet the personnel requirement through intra-enterprise transfer, public entrepreneurs are obliged to transfer up to 75% of the number of the personnel that quit in 2017 by open or recruitment and up to 10% of the personnel are transferred to the State Personnel Presidency. Personnel appointment will be authorized by the board of directors of the public enterprise. Public undertakings will be able to work temporary workers only in seasonal or campaign activities, not exceeding the premium period of 179 premiums a year. The Treasury Undersecretariat will send the General Investment and Financing Program for 2018 to the public enterprises by 30 Nov. 2017. Public enterprises will prepare their 2018 operational budgets based on the program targets and submit to the Treasury Undersecretariat, Development Ministry and, based on the reference, to the Privatization Administration, by 1 Jan. 2018.

R&D Spendings Excluded from Saving Measures

R&D and innovation studies will be attached importance in the fields relevant to the activity areas, and in order to produce quality commodities and services at lower costs under market conditions, developments in production technology will be followed and a close review will be made on the informatics and communications infrastructure as well as organisational structures.

Public enterprises will be obliged to carry out all kinds of transactions related to the improvement of R&D and innovation activities, which will increase their profitability and efficiency and reduce their costs. In this framework, it will be able to work together with domestic and foreign universities or other relevant civil or public institutions or organizations.

Expenditures to be made under R&D studies will be excluded from the austerity measures.

2018 BUDGET RATIFIED

The 2018 Central Administration Budget Law and the 2016 Central Administration Final Account Law have been approved by President Recep Tayyip Erdoğan.

According to the Presidency Press Center, Erdoğan has forwarded the 2018 Central Administration Budget Law No. 7066 and the 2016 Central Administration Final Account Law No. 7067 to the Prime Ministry for publication as per Article 89 (Para.1) and Article 104 (Para.2/a) of the Constitution.

7066 in accordance with the first paragraph of Article 89 of the Constitution and the second paragraph (a) Sent to the Prime Ministr.

National Education Ministry comes third

The Ministry of Finance received an allocation of 177 bln 435 mln 423.000 TL from the 2018 budget.

While the Undersecretariat of Treasury was second with a share of 97 bln 893 mln 775.000 TL allocation, the Ministry of Education followed it with a budget of 92 bln 528 mln 652.000 TL. Allocations to the other managements:

Ministry of Labor and Social Security:
59 bln 720 mln 630.000 TL,

Ministry of National Defense:
40 bln 402 mln 239.000 TL,
Health Ministry:
37 bln 479 mln 416.000 TL,
Ministry of Family and Social Policies: 26 bln 690 mln 506.000 TL,
Security General Directorate:
27 bln 792 mln 655.000 TL,
Ministry of Food, Agriculture and Livestock:
21 bln 676 mln 673.000 TL,
Ministry of Transport, Maritime Affairs and Communications:
14 bln 945 mln 751.000 TL.

Special Budget Administrations

The Special Budget Administrations' 2018 budget:
State Hydraulic Works:
12.9 bln TL,
State Highways Administration:
18.1 bln TL,
Higher Education Credit & Hostels Ins:
13.9 bln TL,
Forestry General Directorate: 3.1 bln TL

UND PRESIDENT: CUSTOMS PROCEDURES BIGGEST PROBLEM FOR LAND TRANSPORTATION SECTOR

UND President Şener: The biggest problem of the international road transport sector is the long waiting periods in external customs and the obligation to visit the inland customs...

Fatih Şener, Chief Executive Officer of the International Transport Association (UND) has evaluated the Turkish international transportation industry.

Şener stated that, despite regional, international crisis and fluctuating oil prices in 2017, Turkey experienced the year well, adding that Turkey's exports to the relevant countries halved with the reduction of the purchasing powers of countries that subsist on oil

Many projects were postponed in Central Asia, which affected Turkish transport figures negatively. Russia has not yet normalized in terms of transport. Political tensions with Germany reflect negative outcomes.

In spite of all the environmental impacts and hitches at Turkey's western Gates, there was a 10% rise in cargoes.

Şener said, "The number of our international travels on land road increased by 6 percent during the January-October period of 2017 compared to the same period of 2016 and reached 1.030.471.

We expect that The number of international flights in 2017 will amount to 1.250.000, if we do not face a big problem."

Transportation needs to accelerating to reach the targets of 2023

Mentioning about the rates of change seen in the transportation figures, Şener drew attention to the necessity of accelerating the transportation to reach the 2023 targets.

Şener, stating that especially thanks to "One Belt One Road" Project launched by China, tremendous opportunities are expected to emerge for Turkey, said, "Turkey's 2023 export target was to reach the figure of \$ 500 billion but this deviated partially but at the moment we can not evaluate the forecast because of regional uncertainties.

However, in recent years, the tourism sector, having generated an annual revenue of \$ 25 billion, dropped its contribution to \$19.5 billion due to the crisis with Russia, and after the transportation was considered a service export, its significant contribution of \$ 15 billion became more visible.

It is possible to reach the targets of 2023 by speeding up the transportation and improving the processes. By resolving the regional crises in a way, we expect to see an increase in exports that will attract the whole world, even if it is not 500 billion in 2023."

The biggest problem is customs

Şener pointed out that the biggest problem of the international road transport sector is to have to wait for heaps of time at the external customs with the obligation to visit the inland customs.

"Recently, many companies such as those in the automotive side industry and textile sectors, have invested in the Balkans, Serbia, in order to overcome these difficulties and to be closer to the Europeans to whom they deliver their goods.

Even some European countries and the EU countries, appear to encourage small companies in the side industry to invest in the Balkans, and we see that they provide extra incentives for those that have already made investment there.

We realize that our exits from the border are faced up partly with hurdles in our processes and partly with the extra controls on the Bulgaria border.

Indeed, the customs is a problem for us at this point, and we can not get out of the gates with our existing export potential though we claim to raise our exports by 3 fold.

Actually, it takes 37 hours for a vehicle arriving at the Erenköy customs office in Istanbul to pass through kapikule.

While We plan to go to Munich within 36 hours we cannot leave Turkey within 37 hours, unfortunately."

Şener also noted that the fluctuations in fuel prices negatively affected the sector, reminding that the transportation industry's biggest expense is fuel.

THREE -LEVEL İSTANBUL TUNNEL PROJECT CONSTRUCTION TENDER TO BE HELD IN 2018

There are new developments in the 3-Level Big Istanbul Tunnel project that was auctioned by the Infrastructural Investments General Directorate of the Transport, Maritime Affairs and Communication Ministry.

Minister of Transport, Maritime Affairs Arslan said that the sea drilling works have been carried out for the 3-level İstanbul Tunnel Project. The construction will be tendered in 2018 with the build-operate-transfer model.

Arslan also said that the tunnel that will be integrated to many rail systems from İncirli' to Söğütlüçeşme will carry 6,5 million passengers daily.

Arslan noted that under the consultancy services, the sea bottom drilling works have been carried out and all the works will be completed by end of the year.

Arslan said, "The rail system which go underground at İncirli will go on undersea via Mecidiyeköy and Zincirlikuyu and entering at Söğütlüçeşme it will be connected to Kadıköy-Kartal and Marmaray. In the European side, the tunnel will go

down at Hasdal and will be United to this tunnel in the same way. Passing to the Anatolian side, it will go out at Çamlık and be linked to TEM.

This will be an important advantage for automobiles in the land road transportation.

Marmaray extends from Halkalı to Gebze in integration to all the rail systems. In the same way, this will be integrated to the rail systems between İncirli and Söğütlüçeşme. We have taken important strides in the Project. In the coming periods, we will start the process of building.."

Project Services Contract Concluded

Following a tender held on 5 April this year for the project's consultancy, engineering and Project services under file no **2016/468276**, the contract was awarded to **YÜKSEL PROJE A.Ş** quoting 28.835.000,00 TL over an estimated cost of 36.591.134,32 TL on 17 May. (DETAY-1527)

THE NUMBER OF NEWLY LAUNCHED COMPANIES RISES BY 14% IN 2017

Turkish Union of Chambers and Commodity Exchanges (TOBB) said in a report that Turkey's new business filings were up in 2017.

The number of newly launched companies in the country rose by 14.4 percent year-on-year in 2017

TOBB said 72,871 companies were established last year, up from 63,709 in 2016. The report showed that 13,517 companies went out of business in 2017, marking a 22.5 percent increase compared to the previous year. Of the total companies and cooperatives established, 2,012 were involved in wholesale and retail trade, repair of motor vehicles and motorcycles, 937 construction and 775 in the manufacturing sector. Of the real persons commercial enterprises that are established, 506 of them are engaged in wholesale and retail trade, repair of motor vehicles and motorcycles, 785 of construction and 563 of manufacturing.

688 of the closed companies and cooperatives were involved in wholesale and retail trade, repair of motor vehicles and motorcycles, 353 in construction, 278 in manufacturing. It is seen that 695 of the real person commercial enterprises were in the wholesale and retail trade, repair of motor vehicles and motorcycles, construction of 316, and transport and storage of 142. In December, 77 cooperatives were established.

The number of newly established foreign-partnered or foreign-funded companies jumped by 49 percent to reach at 6,731 during the same period.

The figure was 4,523 in 2016.

The report indicated an annual rise of 22.9-percent in the number of newly launched companies in December alone, reaching 4,818.

Also in December, a total of 717 foreign-partnered companies were established, the report added.

NUMBER OF CARS IN FLEET REACHES 346.000 UNITS

The asset size of the Operational Leasing Sector has exceeded 26 billion liras. In January-October 2017, 95.500 new automobiles were purchased and thus, the total number of vehicles reached 346.600units.

A growing awareness in Turkey of the advantages of operational leasing is attracting new customers and growing the market. Growing awareness on the advantages of operational leasing, renting instead of buying, is attracting new customers. According to the "Operational Leasing Sector Report in Turkey" by the Turkish Short and Long Term Automotive Rental Association, the total number of operational leasing vehicles in Turkey reached 207,000 in 2013 an increase of 37,000 from 2012.

The figures have recently boom further. In the first nine months of 2017, The Operational Leasing Sector added about 95.500 of the new cars sold in Turkey into its fleet out, which make up 20 percent of the total new car sales. In January-October 2017, the asset size of The Operational Leasing Sector, which invested approximately TL 8.5 billion in new vehicles, exceeded TL 26 billion, while the number of vehicles in the fleet reached 346.600 units.

According to the results of TOKKDER's* market research conducted in cooperation with TNS Global in the third quarter of 2017, the lease sector paid approximately 4 bln 501 mln TL worth of taxes in the first 9 months of 2017. The sector contributed to the country's economy by paying taxes of approximately 4 bln 950 mln TL in 2016. In the 2016 first quarter, where the new passenger car sales in Turkey increased by 0,3 % compared to the 2015 same period (*Source: ODD*), Turkish operational leasing sector added approximately 24.600 new vehicles to its fleet which is equivalent to 19,2% of the new passenger cars sold in Turkey in this year. The vehicle fleet of the Turkish operational leasing sector reached approximately 276.400 units. The change in the number of customers of the sector and the number of passenger car per customer. The number of customers of the sector reached 44.782 by an increase of %24 compared the previous year same period. The number of vehicles per customer falls every year. In 2016 first quarte the figure fell to 5,8 from 5,9 compared to 2015 end year.

This data indicating SMEs as well, prefer operational leasing method to acquire company vehicle fleet, alongside the multinational and local companies. By the end of the research period: Renault in Turkey with the share %30,2 in the car park of operational leasing sector continues to be the most preferred brand, Renault followed by VW with %16,2 and they followed by Ford with %11,7, Fiat with %9,2 Half of the car park sector (%52,5) C segment, whereas B segment %28,5, %12,5 is D segment.

International companies have been benefiting from the advantages of long-term leasing for many years. In recent years, SMEs (KOBİ) and individuals have begun to explore the operational leasing method and the facilities they provide. Thus many SMEs are renting the fleet instead of buying. Operational leasing offers many advantages to every business and to individuals in terms of efficient use of resources and productivity. These advantages are: Vehicle allows you to meet your needs without using equity. Thus, credit limits and other equity allow you to grow your business.

Vehicle tax label, vehicle inspection and similar tax-based payments cannot be shown as an expense when you own the vehicle. However, thanks to the lease, businesses can write the VAT item in the rental bill as an item of expense. While you can plan your cash flow because the rental rates are regular and stable, you can also get rid of the surprise expenses. Tax label, traffic insurance, insurance, kasko and tax transactions are paid by the fleet rental company.

Hybrid And Electric Auto Era

The car park of the operational fleet leasing sector in Turkey consists mainly of diesel vehicles. This rate was 94.9 percent in the January-October period of 2017. But there is a different development in the world. Corporate companies have begun to prefer electric and hybrid vehicles to lower their carbon footprint and reduce fuel costs.

***TOKKDER:** Founded in Istanbul in 1996 to integrate rent-a-car and car leasing companies under the same roof. Vision is to be the only protector and the reference of the operational leasing and rent a car industries acting in perfect harmony with the laws and state policies, with high level of professionalism and ethical values, in order to provide better services to customers.

JOINT VENTURE SET UP TO PRODUCE FIRST DOMESTICALLY-PRODUCED CAR

President Erdoğan announced the five companies to produce the first domestic car at the meeting "Turkey's Automobile Joint Venture Group Promotion"..

Turkey's indigenous car to be manufactured by a joint venture comprising Turkcell, BMC, Kıraca Holding, Zorlu Holding, Anadolu Group..

Turkey launched a joint venture of five local industrial giants to produce its first domestically-made car on last week. Five suppliers - Anadolu Group, BMC, Kıraca Holding, Turkcell, and Zorlu Holding - will jointly manufacture Turkey's first indigenous car.

At the ceremony at the presidential palace in Ankara, President Recep Tayyip Erdoğan expressed his gratitude to the firms and promised his "full support" for the venture.

Prime Minister Binali Yıldırım also delivered a speech to mark the launch of the landmark venture. The initiative came after repeated calls from Erdoğan for a joint project of the Union of Chambers and Commodity Exchanges (TOBB) and the Science, Industry and Technology Ministry.

Erdoğan said he expected the prototype of first domestically-produced car to be ready in 2019 and for sales to start in 2021. "I want to own the first such automobile and I will pay for it," he said, adding that he would prefer a hybrid or an electric car option.

Erdoğan also said that the initiative group of Turkey's automobile will decide on the class, design, engine technology, model, production method and market targets for the car.

He said that they could also lean toward producing hybrid and electric cars, indicating that regardless of the decision, they will provide all kinds of support as long as the Turkish nation is adequately equipped to realize its dream.

For his part, Yıldırım praised the "bravehearts" who will carry out the project. "Turkey has the engineers, technicians, workers and bravehearts necessary. And they will have the state backing them," he said.

Also speaking at the ceremony, TOBB chairman Rifat Hisarcıklıoğlu said it was the "right time" for a 100 percent Turkish automobile.

"Century-old automobile giants are racing with each other in new-generation car technologies. So now is the right time for the Turkish automobile. We will work very

hard for three or four months to analyze the alternative technologies and funding options," Hisarcıklıoğlu said.

Anadolu, BMC and Kıraca are already directly involved in car manufacturing, while Turkcell is the country's largest mobile operator and will engage in the project for technological support. Zorlu is a multi-sector conglomerate, which manufactures computers and white goods along with many other businesses.

Science, Industry and Technology Minister Faruk Özlü said that the government's goal for the country's first domestically produced automobile is for it to hit the road around the world.

Özlü said they are aiming for worldwide success with the project and there is no obstacle for Turkey not to realize its half-century-old dream.

"We are carrying out serious work and we hope we will complete Turkey's automobile at the previously set time. Our goal for the automobile is for it to make an appearance not only in Turkey, but on global roads as well. We aim a global success with this project. We are thinking of manufacturing a car not only for Turkey, but for the whole world," he said.

The minister added that the automobile is being projected according to the new realities of the automotive world along with the changing industrial structure.

"The era of the internal combustion engine is about to end. Henceforth, electric cars are the future. On this path we are taking, we aim to catch the future. Our car will run on electricity.

I believe we have chosen the right time for the electric car.

Our president's instruction in terms of timing was a very good decision. Ours is to put it into practice. The intellectual property rights of the prototype for Turkey's automobile will belong to our country.

These vehicles will be a kind of walking software," he said.

"Our 2023 goal is not the ultimate goal for us, but an intermediate goal we have set in order to reach our main goal.

A Turkey that has realized its 2023 targets will go toward its 2071 targets with much more confident steps. We have pursued our work with this consciousness, and we will continue to do the same."

INVESTMENTS IN WIND POWER (RES) EXCEED \$1 BLN

There has been two fold interest in investments in wind power as being one of the Renewable Energy Resources in the last 11 years. RES projects that had 146 MW capacity in 2007 reached a capacity of 6500 MW in 2017..

According to the Turkish Wind Energy Association (TÜREB), about 8 percent of the electricity produced in Turkey is obtained from wind energy. There are currently 158 companies in operation in this sector and 32 projects are at the stage of building with a total installed capacity of 808 MW.

Izmir, which has a 20.5 percent share of the wind energy power, occupies the first place with an installed capacity of 333 MW. This is followed by Balıkesir, where 16.5 percent (1.069 MW) of the existing wind power plants is located, and then Manisa having a share of 10 percent with 650 MW capacity.

5 -day bidding sessions

Tenders were held between by the Turkish Electricity Transmission Co. (TEİAŞ) 25-29 December 2017 regarding the allocation of pre-licences for construction of wind power plants.

On December 25, 2017, proposals were received for 8 regions with a total pre-license of 430 MW. 101 companies had applied. Contracts were awarded to more than one sharing the total MW:

06 / Amasya – Samsun (Total 60 MW)

49 MW (of the 60 MW capacity):

-0,88 \$ cent/kWh, Doğages Elektrik Üretim Anonim Şti.'s Doğages RES Project,

11 MW part: -0,55 \$ cent/kWh, Ekores Enerji Elektrik Üretim Anonim Şti.'s Taşova RES Project,

23 / Çorum – Kastamonu – Sinop (Total 70 MW)

5 MW part: -0,71 \$ cent/kWh, Ekores Enerji Elektrik Üretim Anonim Şti.'s Kozcu RES Project,

65 MW part: -0,66 \$ cent/kWh, Res Anatolia Holding Anonim Şti.'s Topaz RES Project,

08 / Antalya (Total 100 MW)

50 MW part: -1,18 \$ cent/kWh, Enyat Enerji Yatırımları Elektrik Üretim Tic. AŞ.'s Alanya RES Project,

10 MW part: -0,57 \$ cent/kWh: Dere Enerji AŞ D3 RES Project,

10 MW part : -0,48 cent/kWh, D1 RES Project,

-0,48 cent/kWh,. 20MW part (each 10 MW): 30 MW: -0,52 cent/kWh, Akhisar Enerji AŞ Dökükdağı RES Prj,

18 / Bitlis – Muş (Total 40 MW)

20 MW part: 7,10 \$ cent/kWh, Difer Enerji Sanayi Ve Ticaret Anonim Şti.'s Miskevank RES,

20 MW part: 6,95 \$ cent/kWh, Beres Elektrik Üretim Anonim Şti.'s Örenlik RES Project,

19 / Bolu – Düzce – Sakarya (Total 30 MW)

All of the 30 MW capacity: 3,78 \$ cent/kWh, Günışığıges Elektrik Üretim A.Ş.'s Günışığıges RES Prj,

25 / Elazığ (Total 40 MW)

All of the 40 MW cap.: -0,63 \$ cent/kWh, Buca Rüzgar Güneş Yenilenebilir Enerji ve Elektrik Üretim A.Ş.'s Buca RES Project,

28 / Gaziantep – Kilis (Total 40 MW)

All of the 40 MW capacity: -1,63 \$ cent/kWh, Lacivert Yenilenebilir Enerji Ve Elektrik Üretim Anonim Şti.'s Lacivert RES Project,

31 / İstanbul (Total 50 MW)

49,5 MW part: -1,71 \$ cent/kWh, Gelgit Yenilenebilir Enerji's Gelgit RES Project,

0,5 MW part: -0,65 \$ cent/kWh, Polat Enerji's İstanbul RES Project,

Bidding date: 26.12.2017

On the 2nd day of the biddings, a total of 350 MW capacity was allocated for 8 regions.

The winners and their projects are as follows;

Contract awards were made to more than one firms that have shared the total MW given.

02 / Adıyaman (Total 40 MW)

Of the 40 MW capacity 20 MW part: -1,40 \$ cent/kWh, Errol Enerji's Arıkonak RES Project,

20 MW part: -0,77 \$ cent/kWh \$ cent/kWh, Özgül Lilyum Yenilenebilir Enerji's Lilyum RES Project,

09 / Ardahan – Kars (Total 40 MW)

20 MW part: 7,29 \$ cent/kWh, Ceres Elektrik Üretim Anonim Şirketi Gümüştepe RES The rest 20 MW part: No allocation as only one bid came in.

26 / Erzincan (Total 50 MW)

50 MW capacity: 48 MW part: -1,33 \$ cent/kWh, Arapgir A.Ş.'s Arapgir RES

2 MW portion: 6,20 \$ cent/kWh, Bengü Enerji Üretim Sanayi Ve Ticaret Anonim Şti's Bengü RES Project,

39 / Malatya (Total 80 MW)

80 MW capacity: 30 MW part: -1,81 \$ cent/kWh, Tunna Enerji Üretim Sanayi Ve Ticaret A.Ş.'s Gülümuşağı RES Project, 50 MW part: -1,22 \$ cent/kWh,

Sandal Yenilenebilir Enerji A.Ş.'s Sandal RES Project.

29 / Hatay (Total 30 MW)

30 MW capacity: -1,83 \$ cent/kWh, Böğürtlen Yenilenebilir Enerji Ve Elektrik Üretim Anonim Şti's Böğürtlen RES Project,

33 / Kahramanmaraş – Osmaniye (Total 40 MW)

Of the 40 MW capacity 20 MW part: -0,90 \$ cent/kWh, Güney Res Enerji's Tanır RES Project,

20 MW part: -0,60 \$ cent/kWh, Ak Jeo Enerji pW-TR1002 RES Project,

37 / Kocaeli – Yalova (Total 40 MW)

All of the 40 MW capacity: -1,41 \$ cent/kWh, Karanfil Yenilenebilir Enerji Ve Elektrik Ür. A.Ş.'s Karanfil RES Prj.

47 / Yozgat (Total 50 MW)

30 MW portion: -1,58 \$ cent/kWh, Sandeks Enerji's Beyyurdu RES Project, 20 MW portion: -1,21 \$ cent/kWh, Menekşe Yenilenebilir Enerji's Menekşe RES Project,

Bidding date: 27.12.2017

On the 3rd day, capacities were allocated for 6 regions. The winners and their projects are as follows;

04 / Ağrı – Iğdır (Total 50 MW)

Of the 50 MW capacity, 20 MW part: 7,27 \$ cent/kWh, Kocatepe Arslanlar Elektrik's İpektepe RES Project, 30 MW part: 7,29 \$ cent/kWh, Knot Enerji's Yakaağzı RES Project,

13 / Bartın – Zonguldak – Karabük (Total 30 MW)

30 MW capacity: -0,15 \$ cent/kWh, Yağmur Res Enerji Yatırım Üretim Ve Ticaret Anonim Şti's Karabük RES Project,

14 / Batman – Mardin – Diyarbakır – Şanlıurfa

60 MW capacity: -1,12 \$ cent/kWh, Uranüsgeş Elektrik Üretim Anonim Şti.'s Uranüsgeş RES Project,

15 / Bayburt – Gümüşhane – Giresun (Total 40 MW)

Of the 40 MW capacity, 30 MW part: -0,12 \$ cent/kWh, Ömer Enerji's Ömer RES Project,

10 MW portion: 7,29 \$ cent/kWh, Eysel Global Elektrik Üretim Anonim Şti.'s Erimez RES Project,

21 / Bursa (110 MW)

45 MW: -1,41 \$ cent/kWh, BER Enerji's Yarış RES Project, 15 MW: -1,05 \$ cent/kWh, Işık Res Enerji's Yalova RES Project, 30 MW: -1,05 \$ cent/kWh, Umut Res Enerji's Kiraz RES Project, 10 MW: -1,05 \$ cent/kWh, Baysal Elektrik'in Çepni RES Project, 10 MW part: NTP Elektrik's Mesudiye RES Project.

27 / Erzurum (Total 50 MW)

50 MW capacity: 5,64 \$ cent/kWh, Yel Rüzgar Enerjisi Yatırımları A.Ş.'s Nenehatun RES Project,

34 / Karaman – Mersin (Total 250 MW)

Of the total capacity, 124.2 MW part: -2.13 \$ cent/kWh, Polat Enerji's Karaman RES,

49,5 MW: -1,59 \$ cent/kWh, Makif Rüzgar Güneş Yenilenebilir Enerji's Makif RES Project,

49,5 MW: -1,53 \$ cent/kWh, Sarmaşık Yenilenebilir Enerji's Sarmaşık RES Project,

12 MW portion: -1,69 \$ cent/kWh, Cerenges Elektrik A.Ş.'s Cerenges RES Project,

14.8 MW portion: -1,52 \$ cent/kWh, Polat Enerji

Sanayi ve Ticaret Anonim Şti.'s Mersin RES

Bidding date: 28.12.2017

Connection capacity has been allocated to 740 MW' more projects.

TEİAŞ completed the 740 MW' portion, the final stage, of the 2130 MW' wind power allocation/pre-licencing tenders. 409 bids were in for 685 projects. Of the 2.130 MW capacity, 2.110 MW portion has been allocated to firms.

Thus, 76 projects have received allocations of capacity in 32 different locations.

The winners and their projects are as follows;

Afyonkarahisar (Total 30 MW)

Of 11 applicants, 9 submitted bids:

23,4 MW portion: -1,89\$/kWh, Polat Enerji A.Ş.'s Karahisar RES Project, 6,6 MW portion: -1,25\$/kWh, Hatmi Yenilenebilir A.Ş.'s Hatmi RES Project

Isparta (Total 60MW)

All of the 60MW: -1,69\$/kWh, Şule Enerji A.Ş.'s Şule RES Project,

Burdur-Denizli-Uşak (Total 50 MW)

Of 20 applicants, 9 submitted bids:

47 MW capacity: -1,49\$/kWh, Batires A.Ş.'s Batires RES Project 3 MW capacity: -0,69\$/kWh, Alternatif Res A.Ş.'s Günalan Project..

Aydın-Muğla (Total 50MW)

Of 31 applicants, 16 submitted bids:

49,5 MW part allotted at: -2,23\$/kWh, to: Lodos Yenilenebilir A.Ş.'s Lodos RES Project

0,5 MW part allotted at: -2,02\$/kWh, to: Ekores Enerji A.Ş.'s Bodrum1 RES Project

Konya (Total 50 MW)

Of 18 applicants, 8 submitted bids:

30MW part allotted at: -1,19\$/kWh, to: İdilres A.Ş.'s İdil RES Project, 20MW part allotted at: -0,56\$/kWh to: Res Anatolia A.Ş.'s İmrenler RES Project,

İzmir (Total 50 MW)

Of 37 applicants, 23 submitted bids:

All of the 50 MW capacity: -2,51\$/kWh, Polat Enerji A.Ş.'s SarıcaRES Project,

Balıkesir (Total 160MW)

94 applications were received, and 54 submitted bids: 9,9 MW part: -2,57\$/kWh, Sarı Kanat Enerji A.Ş.'s Balya RES Project,

150,1 MW part: -2,51\$/kWh, Polat Enerji A.Ş.'s Duygu RES Project.

Çanakkale (Total 260MW)

99 applications were received, and of them 59 submitted bids. The total capacity has been shared by:

71,4 MW portion: PNE Wind Ltd. Şti.'s Köşeler RES Prj., (-2,87\$/kWh) ,

99,9MW portion: Polat Enerji A.Ş.'s Çınar RES Project, (-2,42\$/kWh) ,

10 MW portion: Selin5 Enerji A.Ş.'s Selin5 RES Project, (-2,81\$/kWh) ,

10 MW portion: Selin4 Enerji A.Ş.'s Selin4 RES Project, (-2,71\$/kWh),

10 MW portion: Selin3 Enerji A.Ş.'s Selin3 RES Project, (-2,70\$/kWh),

40 MW portion: Yakın Yenilenebilir Ltd. Şti.'s Ayça RES Project, (-2,11\$/kWh),

5MW: Merkom Enerji A.Ş.'s Yel Değirmeni RES Project (-2,35\$/kWh),

9,9 MW: Balay Enerji A.Ş.'s Gönen RES Project (-2,10\$/kWh),

3,8 MW portion: KeremRES Elektrik A.Ş.'s Kerem RES Project, (-2,09\$/kWh),

Manisa (Total 30MW)

23 applications were received, and of them 14 submitted bids. All of the 30 MW capacity has been contracted to: Düzce Rüzgar Yenilenebilir A.Ş.'s Düzce RES Project, at a cost of -2,02\$/kWh.

Latest wind power tenders

Around 300 projects of 10.000 MW capacity contested in 11 regions. Within 3 days, an allocation of 710 MW would be made for 11 regions. Tenders were held on 21-22-23 June 2017 regarding the 710 MW part of the allocation of the 3.000 MW RES capacity, for which applications had been received in April 2015 (DETAY-1531). When the subject plants are put into operation, the wind power capacity is supposed to rise by 12.5%. Below are the tenders held recently:

21 June tender...

35 / Kayseri-Niğde (80 MW)

01 / Adana (120 MW)

07 / Ankara-Kırıkkale-Çankırı (60 MW)

05 / Aksaray-Kırşehir-Nevşehir (60 MW)

A total of 320 MW' capacity was tendered.

Winners :

Kayseri-Niğde (80 MW):

-Esengüç Enerji, Ovacık RES, -0,01 \$ cent/kWh, 15 MW

-Enerjisa Enerji, Erciyes RES, 2,90 \$ cent/kWh, 65 MW

Adana (120 MW):

-Akdeniz RES Enerji, Mansurlu RES, 4,74 \$ cent/kWh, 60 MW

-CNG Enerji, Andoz RES, 4,78 \$ cent/kWh, 32 MW

-Atasa RES Enerji, Atasa RES, 5 \$ cent/kWh, 23,4 MW

-Günyeli RES, Saimbeyli RES, 5,12 \$ cent/kWh, 4,6 MW

Ankara-Kırıkkale-Çankırı (60 MW):

-Simge RES Elektrik, Beypazarı RES, 4,18 \$ cent/kWh, 20 MW

-Jüpiterges Elektrik, Jüpiterges RES, 4,19 \$ cent/kWh, 40 MW

(Lowest bid price, -0,12 \$ cent/kWh quoted by Kires Elektrik. However, a capacity allocation has not been made to the firm as its project overlapped with the others).

Aksaray-Kırşehir-Nevşehir (60 MW):

-RES Anatolia Holding, Opal RES, -1,15 \$ cent/kWh, 60 MW

Tenders held on 22 June 2017...

24 / Edirne (40 MW)

44 / Tekirdağ (60 MW)

36 / Kırklareli (70 MW)

The 2nd round of the tenders opened by TEİAŞ for 710 MW wind power allocations was held on 22 June 2017, when the following firms contested:

Edirne (40 MW- 32 firms participated):

-Fesleğen Yenilenebilir Enerji, Fesleğen RES, -1,51 \$ cent/ kWh, 40 MW

Tekirdağ (60 MW -36 firms participated):

-Kaktüs Yenilenebilir Enerji, Kaktüs RES, - 1,49 \$ cent/ kWh, 49,5 MW

-Buket Yenilenebilir Enerji, Buket RES, -1,48 \$ cent/ kWh 10,5 MW

Kırklareli (70 MW- 34 firms participated):

-Res Anatolia Holding, Elmacık RES, - 1,61 \$ cent/ kWh, 70 MW

23 June 2017 tenders...

43 / Sivas (80 MW)

45 / Tokat (40 MW)

41 / Ordu (50 MW)

16 / Bilecik-Eskişehir-Kütahya (50 MW)

Pelit RES has received the allocation of all the 80 MW capacity in Sivas out of the 220 MW in the regions of Sivas, Tokat, Ordu and Bilecik-Eskişehir-Kütahya. The firm has quoted - 0.81 cent/kWh

Baysal Elektrik's Bayır RES has received the allocation of the 100 MW capacity in Ordu quoting -0.37 cent/kWh, the lowest of all. The rest 40 MW portion has been awarded to **Özgül Kamelya's Kamelya RES**.

23 projects contested the 40 MW cap. in Tokat Region. **GRGN Rüzgar Enerji Santrali Projesi** has received the allocation with a bid offer of -0.33 cent (dollar) per kWh

24 projects contested the 50 MW cap. in Bilecik-Eskişehir-Kütahya. **RES Anatolia** received with an offer of -1.03 cent (dollar) per kWh below the market price

YEKA tender held on 3 August 2017...

The tender for Renewable Energy Resource was also concluded. **Siemens-Türkerler-Kalyon Enerji** won a \$1bn tender, with the lowest price of \$3.48 cent/KWH per kilowatts. (DETAY-1537).

2018 INVESTMENT PROGRAM'S PROJECT VALUE 804.6 BLN TL

The İstanbul Metropolitan Municipality's Assembly ratified the Metropolitan Municipal draft budget worth 20 billion 100 million TL for 2018. The Municipality Assembly debated the Metropolitan Municipality's Performance Program for 2018, the Investment and Services Program for 2018, the 2018 Financial Year Budget, and the Revenue-Expenditure Forecasts for the periods of 2019-2020.

Mayor Mevlüt Uysal submitted the 2018 Budget Draft to the Municipal Assembly members during the meeting chaired by Municipal Vice President Gökşel Gümüşdağ. Mayor Uysal said, "Together with İSKİ, İETT and companies, our consolidated budget has reached an amount of 42,6 billion. We prepared an investing budget with principle of little talk but a lot of business.". Mayor Uysal pointed out during the meeting that they are aware of the responsibility İstanbul imposes on them and that they are working on a budget that will meet the needs of the city. He said, "We have determined the municipal budget of the year 2018 as 20 billion 100 million liras. This figure is an increase of 8.65 percent compared to the past year. When we add İETT, İSKİ and our affiliates to the budget of the Metropolitan Municipality, the overall budget reaches a figure of 42 billion 600 million TL. Our investments in 2018 have a total value of 16 billion 113 million liras with the addition of our companies and affiliates are included. This shows that our budget draft is exactly for investment purposes, as we wish to make the greatest investment as much as possible in the future of İstanbul."

İBB's Fiscal Structure is strong

Mayor Mevlüt Uysal said that the revenue budget is 16 billion 250 million liras, and that the revenue-expenditure balance will be made possible through the internal and external borrowings. "This year, a 3 -billion 850 -mIn lira worth of borrowing has been envisaged in the budget that is composed of the usage and payment differences. The debt due to be paid within the year is 2 billion 570 million TL. However, the 1 billion 370 million TL part of these debt will be paid for the previous borrowings received from İSKİ and İGDAŞ in the past years. Uysal said, "When we drop off these, the figure we will have to pay decreases to 1 billion 200 million liras for this year. So the debt we are due to pay makes up the 8 percent of our revenues. An important part of the source that was created through borrowing will be used for rail system investments.."

Greater Share of Investment for Transport

Uysal stated, "We will continue to build our future by multiplying these investments together.", and added that their target is to create an İstanbul that is constantly renewed, planned, developed, with an increasing attraction.

The Mayor, noting that the basic principles of transportation are "to integrate all transportation systems" and that for this reason, the lion's share of 6 billion 822 million TL is allocated to transportation. Uysal underlined that İstanbul has about 500 vehicles launched into traffic each day. "It's so high.

If we allot the private vehicles to transport, we cannot get over it. For this reason, we focus on transporting the people, not the vehicles. And the most efficient way to do this is rail systems." he said.

Uysal went on to say, "We are trying to build the rail systems expanding up to the neighborhood. For example, the Eminönü-Alibeyköy tram line Alibeyköy, which will carry 114.000 passengers per day with 14 stations will solve the traffic problem and make the Eyüp Sultan a full attraction center. So we are now taking trams to up to the places where no minibuses were available before.

The Üsküdar- Çekmeköy- Sancaktepe Line, Turkey's first driverless metro line, has come to an end. The Üsküdar-Yamanevler is opening within 15-20 days.

We have cancelled the Sefaköy-Başakşehir Havaray Line Project and started to build a subway instead. We are connecting this line with the Aksaray-İkitelli Line at Mimar Sinan Station, with the Kirazlı-Halkalı Line at Halkalı Center, and with the Mecidiyeköy-Mahmutbey Line at Mehmet Akif Station. We currently have a total 150-km rail system line that is in service in the city. When we add a 115-kilometer line, which was tendered by the Ministry of Transportation, to the 160-kilometer metro line, which is under construction after being tendered by the municipality, a total of 275 km new rail system is being built in İstanbul.

We know that problems will be solved when the rail system in İstanbul goes up to a total length of 1000 km.

"He said, "In highway systems, we completed 215 junctions. Construction of 18 intersections continues."

İZMİR ESHOT'S BUDGET RATIFIED

The ESHOT General Directorate's 2018 budget was ratified as 875 million TL with an increase of 17 percent. **Mayor Aziz Kocaoğlu** gave thanks to the employees of ESHOT, who played a role as a backbone in urban transportation, giving good news that 90 minutes of speculation will not be applied and 100 vehicles will be added to the fleet. The 2018 Fiscal Year Performance Program and Income-Expenditure Budget prepared under the framework of ESHOT's 2015-2019 Strategic Plan, which undertook most of the public transportation burden in Izmir, was presented to the approval of the Metropolitan Municipal Assembly.

While the performance program and the budget were accepted by the majority votes of the members of the parliament, the ESHOT's budget, which was 746 million liras in 2017, was increased by 17 percent to 875 million 697 thousand liras.

Mayor Aziz Kocaoğlu stated at the meeting that the fleet will add 100 new vehicles and that their 90-minute practice will continue. Kocaoğlu said, "The Izmir

Metropolitan Municipality, together with its companies, subsidizes transportation with not 300 million, not 500 million, but with a budget of 600 million TL.

The ratio in Istanbul is twice this size. A special inspection is needed on why we suffer loss from transportation.

The cost is 2,75 TL for wheeled transport..To say that it is a 'waste' is a separate issue.

Then the central government will come up with a law stipulating that transportation companies have to reflect the cost to the ticket."

The Mayor also said that the cost of purchasing electric buses is 2.5 times more than other buses. The ESHOT, which allocates 70 million TL of the 2018 budget to new articulated and solo bus purchases, will build new garages at different points of the city for buses, while modernizing its existing service units.

The number of card-filling machines will also be increased to facilitate and promote the use of contact-free smart cards

GAZİANTEP METROPOLITAN MUNICIPALITY'S 2018 BUDGET DISCLOSED

The Gaziantep Metropolitan Municipality's Assembly convened and Municipal Fiscal Budget for 2018 was determined as 1 billion 550 million TL.

TOTAL: 123 UNITS		

ANKARA METROPOLITAN MUNICIPALITY'S EGO AND ASKİ 2018 BUDGETS RATIFIED

Ankara Metropolitan Mayor Assoc. Dr. Mustafa Tuna said, "We need to ban the sale of dogs to pet shops." President Tuna, who chaired the Metropolitan Municipality's 2018 Fiscal Year Budget meeting, firstly made evaluations on the recommendations of the assembly members. Tuna said, "There are various opinions about street animals, and we need to find a permanent solution to this situation.

Tuna said that they will meet with district municipalities and expert teams and take joint decisions on how to manage street animals. "We have to ban animal sales in pet shops. I also think that selling an

animal, as a goods, is not accurate. That means it's not a pen, a book, a shoe.

The animal is a living thing. You enslave her. I do not have to sell it like that." Tuna noted.

Following the assessment talks before the budget meeting, the Metropolitan Municipality, ASKİ, EGO 2018 Fiscal Year Budgets were ratified.

After the debates, the Metropolitan Municipality Assembly approved with unanimity the Metropolitan Municipality's 2018 Fiscal Year Budget as 8 billion 10.000TL, ASKİ's as 3 billion TL and EGO's as 990 million TL.

SAKARYA METROPOLITAN MUNICIPALITY'S VEHICLE PROCUREMENTS IN 2018

LIST OF VEHICLES TO BE PROCURED BY STATE MANagements IN 2018 (T- TABLE)

Along with the debates ongoing on the 2018 Central Management Budget Law at the Parliament, the list of vehicles to be procured by general and special budget managements in 2018 according to Law no 5018 Annex Tables (I), (II) and (III) has been disclosed.

According to a **DETAY** survey, 4.526 units of transports vehicles and 50.000 ea bikes are planned to be procured by managements with general budgets and a total of 5.162 units of transports vehicles by

managements with special budgets in 2018. Last year, a total of 6.953 units of transports vehicles were procured by managements with general and special budgets (Of them 6179 units purchased by general budget managements and 774 units by special budget managements).

Below are the subject vehicle procurements (maximum purchasing costs) specified in Table-T for 2018:

T – TABLE (Maximum purchasing costs of the transport vehicles to be procured)

No	VEHICLE TYPE	Max. Purchasing Cost (TL)
1-a (*)	Private Car	151.200
1-b (**)	Private Car	166.350
2	Private Car	54.250
3	Station-Wagon	56.700
4	Offroad car (Min. 4, max. 8 passenger cap.)	96.750
5	Minibus (With driver max. 17 passenger cap.)	87.500
6	Station Car (Offroad services)	127.500
7	Pick-up (Small truck, with driver 3 or 6 passenger cap.)	77.700
8	Pick-up (Small truck, offroad services With driver 3 or 6 passenger cap.)	98.600
9	Panel	76.400
10	Midibus (With driver max. 26- passenger cap.)	167.850
11-a	Bus (With driver min. 27, max. 40 passenger cap.)	262.550
11-b	Bus (With driver max. 41 passenger cap.)	598.250
12	Truck, Chassis cabin full weight min.3.501 kg	98.550
13	Truck, Chassis cabin full weight min.12.000 kg	145.250
14	Truck, Chassis cabin full weight min.17.000 kg	176.500
15	Ambulance (With medical equipment)	177.550
16	Ambulance (Offroad services)	222.200
17	Pick-up (Small truck) (to be converted to hearse)	78.000
18	Motorbikes (Max.600 cc. cap.)	11.900
19	Motorbikes (Min.601 cc. cap.)	28.500
20	Bikes	2.650
21-a	Private Car with security system (Type and price to be determined by Ministry of Finance)	
21-b	Service Car with security system (Type and price to be determined by Ministry of Finance)	
22-	Other vehicles (Type and price to be determined by Ministry of Finance)	

(*) Vehicles to be purchased by Foreign Affairs Ministry and other offices listen in table (1) attached to Law no 237 for use in state protocol services.

(**) For the offices listed in the first 3 items of table (1) attached to Law no 237.

Note:

- 1) Maximum purchasing costs specified are before any tax payments. Finance Ministry is authorized to make any changes in the maximum costs and quantities shown in the list.
- 2) Armoured vehicles to be purchased for Security General Directorate are not included in this table.
- 3) Finance Ministry is authorized to make any changes in the maximum costs and quantities shown in the list, based on the view from Ministry of Development
- 4) Types and prices of vehicles to be procured by the Office of Presidency, TGNA and Prime Ministry are determined by the their Higher Administrators.
- 5) According to article 10, para 9 of Law no 237 the number of vehicles to be procured by exchange cannot exceed 50 units for National Defense Ministry, 10 units for Gendarmerie General Command and 5 units for Coast Guard Command.
- 6) The vehicles which are not economical to be procured by administrations in scope of central management through service procurement can be purchased, after a Council of Ministers decision based on proposal by Finance Ministry, with the type and quantity to be demanded by the relevant administration, to be met together with *the 100 ea T-22 other vehicles*, placed among the vehicles to be procured by Finance Ministry as specified in (T) Table, with the costs to be paid for from the relevant administration's budget with reference to the investment program as per regulations set in the decision on the Implementation, Coordination and Monitoring of the 2018 Program

Important Projects That Had Been Tendered within 2017 and Those Lagging into The New Year

Dear Readers;

Last year's major projects of primary importance that were followed up by our correspondents had been reported in various issues of **DETAY Economic Magazine** and our website www.detayhaber.com.tr. Some of them are BOTAS's naturalgas pipelines, YEKDEM's renewable energy projects, İstanbul M.Municipality 's subway projects, Health Ministry's hospital constructions in various provinces, TEİAŞ's energy transmission line projects, and TOKİ's housing and social facility projects.

You can find the list of around 126 important projects, with the details as listed below, monitored in 2017 and those that lagged into 2018.

The latest issue no. of **DETAY Economic Magazine** in which a report took place is also given for reference

PROJECTS ON THE AGENDA

Tenderer : **DIRECTORATE (MINISTRY OF TRANSPORT, MARITIME & COMMUNICATIONS)**

Project : **ANKARA SUBWAY (M4) ATATÜRK CULTURE CENTRE –KIZILAY LINE PROJECT**

Financing : Local source

(DETAY-1551)

Project : **RİZE-ARTVİN AIRPORT INFRASTRUCTURE PROJECT**

Financing : Local source

Latest State : **2016/416372** Registered Tender : Rize-Artvin Airport Infrastructure construction was tendered on 12 Jan. 2017. Quoting 1.078.434.462,28 TL, **CENGİZ İNŞAAT+AGA İNŞAAT** joint venture received the contract (DETAY-1508)

Project : **ÇUKUROVA REGIONAL AIRPORT PROJECT**

Financing : Local source

Latest State : **2016/108770** Registered Tender: Airport construction was tendered on 16 May 2016. Over an estimated cost of 350.000.000,00 TL , **HAZARYOL - BUDAKYOL** joint venture received the contract at a cost of 224 million874 .000 TL. (DETAY-1507)

Tenderer : **ANKARA METROPOLITAN MUNICIPALITY**

Project : **KANAL ANKARA PROJECT**

Financing : Local source -işletme

Latest State : Ankara infrastructure tender was held made on October 13, 2017. Developed by ex-Mayor of Ankara Melih Gökçek, "Kanal Ankara Project" aims to create a strong green recreational zone between the İmrahor Viaduct and the Eymir Lake Basin and a 9.5- km line and 290 -hectare area in the city center. The lowest bid in the tender in which 4 firms participated came from **İNCEKAYA İNŞ. SAN. VE TİC. LTD.ŞTİ VE ENAM İNŞ. TAAH. GIDA SAN. TİC. A.Ş.** joint venture as 89 million TL.. Final decision will be given by new Mayor Mustafa Tuna. (DETAY-1546)

Tenderer : **BOLU MUNICIPALITY**

Project : **WASTEWATER TREATMENT PLANT 2. STAGE CONSTRUCTION PROJECT**

Financing : Local source

Latest State : **2017/427405** Registered Tender: Wastewater treatment plant 2nd stage works and revision (77.000 m3/day) Project was tendered on 27 Sep. 2017. Over an estimated cost of 44.268.444,83 TL, 9 firms contested and. The lowest bid offer was 34.318.097,79 TL quoted by **ÇEVTAŞ ÇEVRE TEKNOLOJİLERİ**. (DETAY-1544)

Tenderer : **PETROLEUM PIPELINES CO. (BOTAŞ)**

Project : **NORTH MARMARA NATURALGAS STORAGE EXPANSION (PHASE III) PROJECT**

Financing : Local source -European Investment Bank (EİB)

Latest State : After the preselection held on 16.06.2017, eligible firms submitted their offers over an estimated cost of 4.543.771.906 TL. But only **RÖNESANS ENDÜSTRİ-RENAISSANCE HEAVY INDUSTRIES** (Russia)'s envelope was opened (DETAY-1557) . Its offer 2.589.000.000 TL .

The other qualified firms:

- SAIPEM S.p.A. (ITALY) - ÇALIK ENERJİ SAN. VE TİC. A.Ş. (TURKEY) JOINT VENTURE
- INTECSA INGENIERIA INDUSTRIAL S.A. (SPAIN)
- L&T HYDROCARBON ENGINEERING LIMITED (INDIA)
- SAPURA FABRICATION (MALAYSIA), TEKFEN (TURKEY) & SAPURA DRILLING (HONG KONG) JOINT VENTURE
- ACS (SPAIN) - GAMA (TURKEY) JOINT VENTURE
- TCC (CHINA) – COOEC (CHINA) - COSL (CHINA) JOINT VENTURE
- İLK (TURKEY) - CPECC (CHINA) – CNOOC (CHINA) JOINT VENTURE (Conditional agreement)
- CHENGDA (CHINA) - HONGHUA (CHINA) - KOLİN (TURKEY) - KALYON (TURKEY) (Conditional agreement)

Project : **TURKSTREAM LAND SECTION 1ST STAGE PROJECT**
Financing : Local source – with credit
Latest State : 48 inch diameter and 68+846,21 m long TurkStream Land Section-1 Naturalgas Pipelines Construction Project started. It starts from Kıyıköy PİG (Thrace-Kırklareli) station and terminates at Misinli PİG (Çorlu-Tekirdağ) station. BOTAŞ finalised the Land Survey Mapping and Expropriation Engineering Services Tender and awarded the contract to **Kartal Harita Müh. Taah. Tic. Ltd. Şti.**. The firm determined the final route in line with the opinions of the public institutions and organizations within the framework of the contract and carried out the studies on the expropriation and EIA (ÇED) Report.. When the project is completed, it will consist of two parallel pipelines, each of which will have a capacity of transporting 15,75 billion m3 of gas per year. Each line will be laid by combining thousands of separate pipe sections. The first line to be connected to the Turkish main distribution network in Lüleburgaz will be developed by BOTAŞ. The second line will continue by land to the Turkish-Greek border. It will be built with Gazprom and BOTAS partnership.. (DETAY-1557)

Project : **ADANA-CEYHAN TUGBOAT PORT REHABILITATION PROJECT**
Financing : Local source
Latest State : **2017/504135** Registered Tender: Adana Ceyhan Tugboat Port Rehabilitation Project was tendered on 7 Dec. 2017. Over an estimated cost of 25.073.850,63 TL , the lowest bid offer of 29.890.000,00 TL was quoted by **UĞRAŞ İNŞAAT.** (DETAY-1554)

Project : **ARAKLI-ARDEŞEN ÇAYELİ DISTRICTS AND ARSİN OSB NATURALGAS PIPELINE PROJECT**
Financing : Local Source
Latest State : **2017/197567** Registered Tender: Bids were received on 11 May2017. Quoting 62.855.356,00 TL **MEGARON+TEK-İMAŞ** joint venture received the contract (DETAY-1526)

Project : **ARTVİN NATURALGAS PIPELINE PHASE- 1 PROJECT**
Financing : Local Source
Latest State : **2016/551753** Registered Tender: Artvin Naturalgas Pipelines Phase -1 Tender was held on 12 Jan. 2017. Quoting 19.428.332,00 TL, **ÖZSOY İNŞAAT** received the contract (DETAY-1508)

Tenderer : **STATE AIRPORTS MANAGEMENT (DHMİ)**
Project : **ÇUKUROVA REGIONAL AIRPORT SUPERSTRUCTURE PROJECT**
Financing : Local source
Latest State : **2017/94088** Registered Tender: Çukurova Regional Airport Superstructure Construction tender was canceled on 10 Oct. 2017. Applications had been received on 23 March 2017. DHMİ announced that cancellation was made since the changes earlier made in the technical specifications affected the assessment of proposals and the reconstruction of the manufactured facilities was contrary to the principle of effective and efficient use of public resources.". (DETAY-1546)

Tenderer : **STATE HYDRAULIC WORKS (DSİ)**
Project : **SAMSUN 19 MAYIS DRINKINGWATER TREATMENT PLANT PROJECT**
Financing : Local Source
Latest State : **2017/517217** Registered Tender: The Tender for Samsun 19 Mayıs Drinkingwater Treatment Plant with 100.000 m3 cap. was held on 15 Nov. 2017. Over an estimated cost of 37.809.968,55 TL the lowest bid offer of 32.100.000 TL was quoted by **KAMER İNŞAAT.**

Project : **GEMLİK DRINKINGWATER TREATMENT PLANT PROJECT**
Financing : Local Source
Latest State : **2017/432685** Registered Tender: The Tender for Bursa Gemlik Drinkingwater Treatment Plant was held on 5 Oct. 2017. Over an estimated cost of 38.277.632,98 TL 10 firms submitted offers.. The lowest bid offer of 29.941.000,00 TL was quoted by **MİTAŞ PROJE + ARSAN ARITMA** joint venture. (DETAY-1545)

Project : **AKSARAY DRINKINGWATER TREATMENT PLANT PROJECT**
 Financing : Local Source
 Latest State : **2016/597557** Registered Tender: The tender for Aksaray Drinkingwater Treatment Plant was held on 14 Feb. Over an estimated cost of 23.675.260,98 TL, **BETAŞ BETON VE PREFABRIKE YAPI ELEMANLARI** received the contract quoting 25.895.000,00 TL (DETAY-1513)

Tenderer : **STATE HYDRAULIC WORKS (DSİ) 6. BÖLGE MÜDÜRLÜĞÜ**
 Project : **OSMANIYE SABUNSUYU ÇATAK DAM AND HPP PROJECT**
 Financing : Local Source
 Latest State : Çatak DAM is planned to be constructed within the scope of "Sabunsuyu Çatak Dam Planning and Project Services" for irrigation water, energy and drinking water supplies within the boundaries of Osmaniye's Düziçi District. The Project has an estimated cost of 1 008 803 071 lira and it will enable the supply of water from Çatak Dam, instead of the underground water wells and Sabunsuyu resources by open channel, to irrigate Haruniye and Sabunsuyu lands areas by using a high pressure irrigation system. Thus, there will be a significant decrease in irrigation water costs, and a rise in irrigation rates, irrigation efficiency and profitability. In addition, Çatak Dam Hydroelectric Power Plant planned to be constructed will supply energy as well as drinking water for Düziçi District. The installed capacity of the hydroelectric power plant will be 11.55 MW. Estimated to have an economic life of 50 years, all the proposed constructions will be completed in 4 years. **Undertaker of the planning and project services contract:** The tender for the planning and project services was held in 2015 under file no 2014/174928 for Sabunsuyu Çatak Dam . Over an estimated cost of 2.014.880,11 TL the contract was awarded to **TEMLSU ULUSLARARASI MÜHENDİSLİK HİZ. A.Ş.** quoting 1.650.000,00 TL. Contract date: 30.04.2015.

Tenderer : **STATE HYDRAULIC WORKS (DSİ) 25. BÖLGE MÜDÜRLÜĞÜ**
 Project : **ÇANAKKALE 2. STAGE DRINKINGWATER TREATMENT PLANT PROJECT**
 Financing : Local Source
 Latest State : **2017/512854** Registered Tender: Bids were received on 22 Nov. 2017. Over an estimated cost of 45.236.102,00 TL, and limit value of 33.703.352,79 TL 9 offers were submitted.. The lowest bid offer of 34.723.000,00 TL was quoted by **HMC YAPI + FABER İNŞAAT** joint venture. (DETAY-1552)

Tenderer : **ETİ MADEN İŞLETMELERİ GENEL MÜDÜRLÜĞÜ**
 Project : **BİGADIÇ CONCENTRATOR PLANT PROJECT**
 Financing : Local source

- Project : **ELMALI-FETHİYE REF.H.647 ENERGY LINES CONSTRUCTION PROJECT**
Financing : Local Source
Latest State : **2017/408650** Registered Tender: Ref.H.647 (~85 km) 154 kV 1272 MCM Conductor Elmalı – Fethiye ETL construction tender was held on 25 Sep. 2017. Over an estimated cost of 20.014.957,50 TL, the lowest bid offer was 17.946.000,00 TL submitted by **KAR-PA ELEKTRİK. (DETAY-1544)**
- Project : **REF. TKABY 44 SEYHAN TM BRŞ N NORTH ADANA GIS UNDERGROUND POWER CABLING PROJECT**
Financing : IBRD
Latest State : **2017/213794** Registered Tender: For Ref. TKABY. 44, Seyhan TM BRŞ N–North Adana GIS TM 154 Kv, 2x1000mm² XLPE İnsulated Underground Power Cabling Project , the tender was held on 31 May 2017 and quoting 15.834.000,00 TL, **EMTA ENERJİ A.Ş.** received the contract **(DETAY-1528)**
- Project : **ÇAN HAVZA SUBSTATION PROJECT**
Financing : IBRD
Latest State : For 380/154/33 kV Çan 380 Havza substation, the tender was held on 29 May 2017. 8 submitted offers. The lowest bid offer 11.633.000 Euro was submitted by **AVNİ ULUTAŞ. (DETAY-1528)**
- Project : **154 KV KARABAĞLAR TM AND BUCA TM UNDERGROUND POWER CABLING PROJECT**
Financing : IBRD
Latest State : For Ref. DB. KAB.13 154 kV Karabağlar Substation–Buca Substation Underground XLPE Power Cabling Project, the tender was held on 18 Apr. 2017. 4 firms submitted offers.. **(DETAY-1522)**
- Project : **BURSA EAST İTM 215, 380 KV GAS INSULATED MT PROJECT**
Latest State : **2017/85560** Registered Tender: For Ref. İTM.215, 380 kV Bursa East 380 Gas İnsulated Substation Project, bids were received on 10 Apr. 2017. Over an estimated cost of 81.300.548,46 TL , the contract was awarded to **GRID SOLUTIONS ENERJİ** quoting **58.984.320,50 TL (DETAY-1521)**
- Project : **TAŞOLUK İTM 217, 380 KV GAS INSULATED MT PROJECT**
Financing : Local Source
Latest State : **2017/86155** Registered Tender: For Ref. İTM.217, 380 kV Taşoluk 380 Gas İnsulated Substation Project, bids were received on 11 Apr. 2017. Over an estimated cost of 52.279.752,03 TL, the contract was awarded to **GÜNGÖR ELEKTRİK** quoting 42.727.000,00 TL **(DETAY-1521)**

Project : **İTM 20, 380 KV KÖSE TM PROJECT**
Financing : Local Source
Latest State : **2016/608032** Registered Tender: For Ref. İTM.210, 380 Kv Köse (Gümüşhane) 380 Substation (Dokap) bids were received on 7 March 2017 over an estimated cost of 57.166.023,11 TL. QUoting 48.994.108,00 TL **ASEM GRUP** received the contract (**DETAY-1516**)

Project : **ATIŞALANI TM-SAĞMALCILAR GIS TM UNDERGROUND POWER CABLING PROJECT**
Financing : IBRD
Latest State : **2016/611055** Registered Tender: For Ref. TKABÇY.5, Atışalani TM-Sağmalcılar GIS TM 380 kV, 2000 mm² + 154 kV, 1000 mm² XLPE İnsulated Underground Power Cabling Project, bids were received on 16 Feb. 2017 . 3 firms submitted offers over an estimated cost of 28.397.617,34 TL . Quoting 27.734.500,00 TL, **DEMİREK KABLO** received the contract.(**DETAY-1513**)

Project : **ENERGY TRANSMISSION LINE CONSTRUCTIONS AND CONNECTING LINES IN VARIOUS LOCATIONS**

- **Ref. TKABÇY.6.** Sağmalcılar GIS TM – Çağlayan GIS TM 380 Kv, 2000 Mm² XLPE Insulated Underground Power Cable Connecting Project
Tender reg.no : **2017/268721**
Bid deadline : 07.07.2017
Winner : **BTE ENERJİ++ZRD MÜH.**
Approx. Cost : 62.594.107,55 TL
Contract cost : 46.947.285,00 TL
